I. INTRODUCTION

Struever Fidelco Cappelli, LLC (the "Redeveloper") has proposed a comprehensive mixed-use redevelopment project (the "SFC Project') at sites in the downtown and at the Hudson River waterfront of the City of Yonkers described in the Draft Environmental Impact Statement ("DEIS") for the Project submitted by Redeveloper to the Yonkers City Council, as lead agency for review of the Project under the State Environmental Quality Review Act, as Palisades Point, River Park Center (which includes Government Center and the Palisade Avenue Office Building site) Cacace Center and Larkin Plaza.¹ Pursuant to a Master Developer Designation Agreement ("MDDA") dated as of May 17, 2006, and made between Redeveloper, the City, the Yonkers Community Development Agency ("CDA"), the City of Yonkers Industrial Development Agency ("YIDA"), and the City of Yonkers Parking Authority, Redeveloper is the designated "master developer" of the sites. In May, 2006, Redeveloper was also designated by the CDA as the "qualified and eligible sponsor" of the Project under the Modified Urban Renewal Plan for N.D.P. Area 1 and N.D.P. Area 2 (the "Riverview Urban Renewal Plan") and the Urban Renewal Plan for the Getty Square Urban Renewal Area ("Getty Square Urban Renewal Plan").

About the Project

The development of the SFC Project is a public-private partnership, and without the City's financial participation and support, the SFC Project could not be constructed as described in the MDDA. An essential component of the City's participation is City funding for the construction of the approximately 5,000 public parking spaces at Palisades Point, River Park Center and Cacace Center, and the public sewer, water, road and other infrastructure improvements needed to support the SFC Project (or any other comprehensive redevelopment of the downtown), all of which is currently estimated to cost approximately \$160,000,000 or more.² The Redeveloper's cost estimates have been reviewed by Bluestone Engineering, the City's consultant. Bluestone Engineering estimated construction cost per structured parking space. As the SFC Project moves through the approval process and the public infrastructure and structured parking are designed, more accurate cost estimates will be made..

Municipal Redevelopment Law

The City has made it clear that City funding for these public improvements must be supported by the tax revenues generated by the Project, and not by the general revenues of the City. The vehicle through which this can be accomplished is "tax increment financing" under the New York Municipal Redevelopment Law (New York General Municipal Law Article 18-C) (the "Municipal Redevelopment Law"). Although infrequently utilized in New York,³ tax increment financing is an indispensable self-financing tool used throughout the United States to help local governments

¹ There is no private redevelopment proposed at Larkin Plaza. Larkin Plaza is proposed to be a public improvement project of the City, the cost of which is paid for by tax increment bonds and federal, State and Westchester County grants.

² The \$160,000,000 estimate includes hard and anticipated soft (i.e., design) construction costs, but not the costs of issuance of tax increment bonds, including, but not limited to, underwriter's discount and required capitalized interest, if any.

³ The most significant reason is that the statute does not permit school taxes to be allocated to the tax increment. Therefore, except in the "big five" cities of the State in which school taxes are part of the general real property tax levied and collected by the municipal government, the available increment is not large enough to support debt service on the tax increment bonds issued by the municipality.

successfully redevelop urban renewal areas and encourage economic development.⁴ In tax increment financing, the current real property tax assessed value of all properties in a designated project area ("tax increment financing district") is established as the "base value." As redevelopment in the tax increment financing district increases the assessed values of the redeveloped properties, a portion of the additional tax revenue generated by the increase in assessed value over the base value is set aside and committed by the City (and, as proposed here, the County) for debt service on tax increment bonds, the proceeds of which would be used for the construction of the required public improvements and infrastructure. However, the tax revenue generated by the base value in the tax increment financing district would continue to be general revenues of the City and County useable for any purpose.

Tax increment financing is permitted only in connection with a "redevelopment plan" duly adopted by the City. The process is set forth in the Municipal Redevelopment Law, and is generally as follows:

- The City Council first finds that it is feasible to prepare a study to determine if a redevelopment project within a specified area is feasible, and then designates the area as a survey area and authorizes the preparation of a feasibility ("survey area") study. Any person may request the City Council to designate a tax increment financing district. (See Municipal Redevelopment Law Section 970-c).
- Based on the results of the feasibility study, the City Council may select one or more project areas for redevelopment pursuant to the Municipal Redevelopment Law and provide for the preparation of a "preliminary plan" for the redevelopment project in the selected area(s). The preliminary plan must include, among other things: (a) a description of the boundaries of the project area; (b) a general statement of the land uses and the standards proposed as the basis for the redevelopment Law would be achieved by the redevelopment; (d) a description of how the preliminary plan conforms to "Connections," the comprehensive plan of the City; (e) a general statement of the project area and the surrounding neighborhood; and (f) a statement of why redevelopment of the project area would not be undertaken were it not for the purposes and provisions of the Municipal Redevelopment Law (i.e., tax increment financing). The preliminary plan must be accompanied by an environmental impact statement analyzing the potential impacts of the proposed redevelopment project. (See Municipal Redevelopment Law Section 970-e).
- The City Council must refer the preliminary plan to the City Planning Board and all other City departments and agencies "with responsibility for zoning or land use planning" for review and advisory report and recommendation. (See Municipal Redevelopment Law Section 970-e).
- If the City Council approves the preliminary plan, the City Council must authorize the preparation of a final "redevelopment plan" for the project area. Among other things, the redevelopment plan must contain: (a) a legal description of the boundaries of the project area; (b) by "diagram and in general terms": (i) the approximate amount of open space to be provided and the street layout; (ii) limitations on the type, size, height, number and proposed use of buildings;

⁴ Tax increment financing has been successfully utilized in Baltimore, Pittsburgh, Providence, Atlanta, St. Louis, Memphis, St. Paul, Kansas City, Dallas, Indianapolis, Louisville and Bridgeport, among other cities.

(iii) the approximate number of dwelling units; and (iv) the property to be devoted to public purposes and the nature of such purposes; (c) a "neighborhood impact statement" describing the physical, social and economic conditions existing in the project area and describing the impact of the project on residents of the district and surrounding areas in terms of relocation, traffic circulation, environmental quality, availability of community facilities and services, impact on school population and quality of education, property assessments and taxes, and other matters affecting the physical and social quality of the neighborhood; (d) a description of the proposed method of financing the redevelopment of the project area in detail sufficient to determine the economic feasibility of the plan; (e) adequate safeguards that the work of redevelopment will be carried out pursuant to the plan and provide for the retention of controls and the establishment of any restrictions or covenants running with the land sold or leased by the City for private use for such periods of time and under such conditions as the City Council deems necessary; and (f) a plan for relocation of families and persons to be temporarily or permanently displaced from housing in the project area.

- The redevelopment plan may, among other things, also provide for: (1) participation in the redevelopment project by owners of all or part of the property in the project area; (2) the issuance of tax increment bonds and the use of the proceeds of such bonds to carry out the plan (and if it does, then the plan must also contain adequate provision for the payment of debt service on the bonds); (3) the City to acquire by gift, purchase, lease or condemnation all or part of the land in the district; and (4) the expenditure of money by the City and for the City to undertake and complete any proceedings necessary to carry out the project. (See Municipal Redevelopment Law Section 970-f).
- Before the redevelopment plan is approved by the City Council, it must be referred to the City Planning Board for review and recommendations, which must consider the conformity of the plan with "Connections," the comprehensive plan of the City. The Planning Board has thirty (30) days in which to file its report with the City Council.
- Before the redevelopment plan is approved, the City Council must hold a public hearing on the plan in accordance with the requirements of Municipal Redevelopment Law Section 970-h.
- The redevelopment plan may be approved after the close of the public hearing and after the report of the Planning Board has been filed, provided, however, that if the Planning board fails to file its report within the thirty (30) day period, then the City Council may approve the plan in the absence of the report.

After the redevelopment plan is approved, the City Council is authorized to issue by resolution tax increment bonds "for the purpose of carrying out or administering a redevelopment plan" but only for: (a) acquisition of land; (b) demolition and removal of buildings, structures and improvements and site preparation; (c) installation, construction or reconstruction of streets, walkways, docks, drainage, parking facilities, flood control facilities, water and sewer systems and other public utilities, parks and playgrounds; and (d) other public improvements or services integral to the redevelopment plan authorized by or for which a period of probable usefulness has been established by Section 11.00 of the New York Local Finance Law. (See Municipal Redevelopment Law Section 970-o).

It should be noted that it is proposed that Westchester County and the City enter into a so-called "joint undertaking" under the Municipal Redevelopment Law in which the County would appoint the City as its agent for the purposes of preparing the preliminary plan and redevelopment plan for the project area, each of which would be separately approved by the City Council and the Westchester County Board of Legislators. After the County Board approved the redevelopment plan, it would by resolution irrevocably pledge its tax increment revenues to the debt service on the City's tax increment bonds. (See Municipal Redevelopment Law Section 970-n). The County Board must comply with the same procedures as the City Council, i.e., the preliminary plan and redevelopment plan must be referred to the Westchester County Planning Board and the County Department of Planning, and hold a public hearing on the proposed redevelopment plan).

The Redeveloper has requested that the City issue tax increment bonds in the amount necessary to cover the costs of construction of the public improvements, infrastructure and parking and bond issuance and related financing costs (including capitalized interest and a reserve fund). Bond issuance and financing costs are estimated to be \$32,000,000, making the total estimated amount of the bonds approximately \$192,000,000. As discussed in Section IV of this document and shown in Appendix D of this report, the amount of initial annual debt service on this amount of bonds is estimated to be \$9,504,128,⁵ and would increase to approximately \$18,696,610 in the 30th and final year. The fund to pay the debt service on the bonds will be comprised of approximately 75% of the incremental additional real property tax revenue to the City and County⁶ generated by the SFC Project (i.e., the amount of additional tax generated by the increased assessed value of the Project above the current "base assessed value" of all of the SFC Project sites except Larkin Plaza) and the revenues from the new public parking facilities, which are estimated to be approximately \$2,957,765 in the first year, rising to approximately \$5,048,568 in the final year. The real property tax attributable to the base assessed value and the approximately 25% of the City tax increment that will not be devoted to tax increment bond debt service will be more than sufficient to cover the costs of the SFC Project for school, police, fire and other City services.⁷ The Redeveloper has agreed to "backstop" the debt service on the bonds, and will secure its obligation by providing the kind of security that is typical and customary in connection with tax increment bonding.

This document has been prepared on behalf of the City and is both the feasibility ("survey area") study required under Municipal Redevelopment Law Section 970-c (Sections I through V), and, because the study concludes that the proposed project area described herein is "blighted" within the meaning of the Municipal Redevelopment Law and that a redevelopment project (proposed to be the SFC Project) in the project area is feasible, is also the draft preliminary plan for the proposed redevelopment project (Section VI). This study/draft preliminary plan is accompanied by, and includes by reference, the DEIS for the Project submitted by Redeveloper to the Yonkers City Council. The draft preliminary plan is intended to facilitate the SFC Project that is described in the DEIS. Because the draft preliminary plan is narrowly tailored to the SFC Project, the potential environmental impacts that might arise as a result of the implementation of the proposed

⁵ This is the "gross" annual debt service payment (i.e., before applying debt service reserve fund income and income from operations). Although debt service schedules are uncertain at this point, it is expected that the first payment of debt service from City revenues and not from capitalized interest would be 3 and ½ years after issuance, i.e., after the Project is constructed and has begun operating. Interest expense during the construction period would be capitalized.

⁶As previously indicated, Westchester County participation in "joint undertaking" will be requested, and the County will be asked to pledge 75% of its tax increment to the repayment of the City bonds.

⁷Sales and income tax revenues generated by the Project are additional sources for payment of City services.

redevelopment project are generally indistinguishable from the potential impacts of the SFC Project, and analysis of these impacts is therefore subsumed in the DEIS analyses of SFC Project impacts.

II. BLIGHT STUDY

This section presents an analysis of existing building and lot conditions within the proposed redevelopment project area (the "Study Area"). The Study Area is depicted in *Exhibit II-1*, "*Proposed Municipal Redevelopment Project Area Boundary*."

Section 970-c of Municipal Redevelopment Law defines "project area," in part, as follows:

"Project area means an area of a community which is a blighted area, the redevelopment of which is necessary to effectuate the purposes of this article (Municipal Redevelopment) A project area need not be restricted to buildings, improvement or lands which are detrimental or inimical to the public health, safety or welfare, but may consist of an area in which such conditions predominate and adversely affect the entire area...and may include lands, buildings or improvements which are not detrimental or inimical to the public health, safety or welfare, but whose inclusion is found necessary by the municipality for the effective redevelopment of the area of which they are a part..."

This study: (1) surveys and analyzes the Study Area to determine if it is blighted within the meaning of the Municipal Redevelopment Law; and (2) assesses the feasibility of conducting a redevelopment project (which is proposed to be the SFC Project) in the Study Area in accordance with Municipal Redevelopment Law. Field inspections of the Study Area were conducted in August 2006 and November 2006. Surveys were undertaken by professional planners and architects. In addition, aerial photographs and City land use and property data were reviewed, and building and site conditions, existing land uses, including under-utilization of land, parcel sizes and configurations, and other factors which may contribute to blighting were analyzed.

The redevelopment project proposed for the Study Area is the SFC Project, which consists of 1,386 dwelling units, approximately 1.3 million square feet of non-residential development, over 6,000 parking spaces (of which over 5,000 spaces are for public parking), a minor league ballpark, "daylighting" of, and improvements to, portions of the Saw Mill River at River Park Center and, if the City elects to make them, at Larkin Plaza, construction of a publicly accessible riverwalk along the Saw Mill River at River Park Center and, potentially, a public riverwalk at Larkin Plaza and the creation of a publicly accessible open space along the Hudson River at Palisades Point. In order to facilitate the comprehensive revitalization of the downtown, tax increment bonds are proposed to issued by the City to fund the costs of construction of the public parking facilities and public road, sewer, water and other improvements required to sustain the SFC Project, including the costs of daylighting and improving the Saw Mill River and of construction of the riverwalk at River Park Center and Larkin Plaza.

The proposed redevelopment project is being considered in accordance with the provisions of the Municipal Redevelopment Law, which grants municipalities the power to redevelop blighted areas or cause them to be redeveloped by private parties, and fund the costs of public improvements through the issuance of tax increment bonds and/or notes. The legislative findings of the Municipal Redevelopment Law include the following:

"It is hereby found and declared that there exists in many communities blighted area which threaten the economic and social well being of the people of the state... For these reasons it is declared to be the policy of the state to protect and promote the sound development and redevelopment of blighted areas and whenever the redevelopment of such areas cannot be accomplished by private enterprise alone without public participation and assistance in the acquisition of land, in planning and in the financing of land assembly, in the work of clearance, and in the making of improvements necessary therefore, it is in the public interest to employ the power of eminent domain, to advance or expend public funds for these purposes, and to provide a means by which blighted areas may be redeveloped or rehabilitated."

Specifically, Section 970-c of the Municipal Redevelopment Law defines "blighted area," in part, as follows:

"Blighted area means an area within a municipality in which one or more of the following conditions exist: (i) a predominance of building and structures which are deteriorated or unfit or unsafe for use or occupancy; or (ii) a predominance of economically unproductive lands, buildings or structures, the redevelopment of which is needed to prevent further deterioration which would jeopardize the economic well being of the people."

The following conditions were observed in the Study Area: 1) deteriorated private properties, including residential and commercial structures; 2) inadequate maintenance of buildings and surrounding yards; 3) fully and partially vacant parcels and buildings; 4) underutilized parcels; and, 5) incidence of significant deterioration in public infrastructure including roads, sidewalks and curbs. The detailed results of the survey are presented below.

The conclusion of this study is that the Study Area is a blighted area within the meaning of the Municipal Redevelopment Law. It is noted that the vast majority of the land in the Study Area is located within the Riverview Urban Renewal Plan area or the Getty Square Urban Renewal Plan area, which were both adopted by the City of Yonkers approximately 30 years ago. Both areas have therefore previously been determined by the CDA and the City Council to be blighted and suitable for urban renewal under the New York State Urban Renewal Law (New York General Municipal Law Article 15).

The Riverview Urban Renewal Plan was last amended in October 2004. The Riverview Urban Renewal Area is generally the area along the waterfront and west of South Broadway, primarily between Dock Street and Prospect Street. The Riverview Urban Renewal Area overlaps with the majority of the western portion of the subject Study Area. The Getty Square Urban Renewal Plan was last amended July 10, 1978. The Getty Square Urban Renewal Area is generally the area east of South Broadway and west of Linden Street, primarily between Columbus Place and Guion Street. The Getty Square Urban Renewal Area overlaps with the majority of the eastern portion of the subject Study Area. See *Exhibit II-2, "Existing Urban Renewal Area Boundaries.*" The Getty Square Urban Renewal Area has seen relatively little redevelopment since the Urban Renewal Plan

was adopted 30-years ago, and much of the blighted conditions remain. In contrast, portions of the Riverview Urban Renewal Area have been redeveloped, particularly the areas along the Hudson River shoreline that are approximate to the Metro North Railroad station.

Blight Study Methodology

Section II of this report comprises the Blight Study for the Study Area. The following summarizes the methodology for the information compiled in the Blight Study.

Study Area Boundary:

The Study Area boundary encompasses each of the SFC Project sites, as well as other properties that would likely benefit from the public improvements proposed to be made in the Study Area. (See Exhibit II-1.) A full description of the Study Area boundary is provided on Page II-3.

Field Surveys

Field surveys of the Study Area were conducted by Planners from Saccardi & Schiff, Inc. on August 15 and August 23, 2006. Field survey verification was undertaken on November 28, 2006. The surveys included visual inspections of lots, buildings and public improvements, and exterior physical conditions as well as review of occupancy, property uses, and intensity of current use. The characterization of a building as being in "good," "fair" or "poor" condition was based on the level of visible deterioration and by the characteristics outlined in Table II-3.

Sources:

- General Municipal Law, Article 18-C, Municipal Redevelopment Law

- Field Surveys conducted by Saccardi & Schiff, Inc. (8/15/06; 8/23/06; and 11/28/06)⁸

Existing Conditions

1. Background and Definition of the Study Area

The Study Area boundary, as shown in *Exhibit II-1, "Proposed Municipal Redevelopment Project Area Boundary,*" was drawn to include the SFC Project sites, and other properties likely to benefit directly and indirectly, from the public improvements proposed to be made in the Study Area.

The boundary of the Study Area encompasses all tax parcels within the boundary described generally as follows:

The boundary starts at a point which is formed by the intersection of Linden Street and Elm Street then proceeds south to a point formed by the intersection of Linden Street and Maple Street. At this point, the boundary proceeds west along Maple Street to the intersection of Maple Street and Nepperhan Avenue and proceeds southwest along Nepperhan Avenue to

⁸ Saccardi & Schiff, Inc. is a planning consultant firm located in White Plains, New York. In the past 20 years, the firm has completed approximately 25 blight studies for communities in Westchester, Rockland, Nassau and Suffolk Counties. Prior to establishing the firm, David Schiff and John Saccardi had been actively involved in urban renewal project planning, including preparation of blight studies, with service to communities dating back to 1970.

the intersection of New Main Street at which point it proceeds south along New Main Street to Guion Street. From this point, the boundary follows Guion Street to the intersection of South Broadway, at which point it proceeds north along South Broadway to the intersection of Nepperhan Avenue and Prospect Street. The boundary proceeds west along Prospect Street to the intersection of Prospect Street and Buena Vista Avenue. At this point, the boundary proceeds north along Buena Vista Avenue inclusive of those tax parcels on the west side of Buena Vista Avenue whose rear lot lines adjoin the Metro North Railroad right of way between Prospect Street and Dock Street, and includes those parcels identified in the City's Downtown Waterfront Master Plan as Parcels H and I (the Palisades Point site) on the west side of the Metro North Railroad tracks. From the intersection of Buena Vista Avenue and Dock Street, the boundary proceeds eastward along Dock Street where it intersects North Broadway at which point it proceeds south along North Broadway to Getty Square (the intersection of North Broadway, Main Street, South Broadway and Palisade Avenue). From Getty Square, the boundary proceeds eastward along Palisade Avenue to where it intersects with Elm Street, at which point it proceeds southward, returning to the starting point at the intersection of Elm Street and Linden Avenue.

The Study Area also includes the following parcels that adjoin the boundary described above: at the intersection of Maple Avenue and School Street, the first three tax parcels on the southeast corner heading southbound along School Street; the first four tax parcels on the southwest corner heading southbound along School Street; on Nepperhan Avenue, the tax parcels that front on the south side of Nepperhan Avenue between School Street and New Main Street, and several parcels that adjoin the rear lot lines of these parcels; on Prospect Street, the tax parcels that front on the south side of Prospect Street between Hawthorne Avenue and Buena Vista Avenue; the first three tax parcels on the west side of Buena Vista Avenue south of Prospect Street; the tax parcels that form the block bounded by Dock Street to the south, Wells Avenue to the north, Bashford to the west, and Woodworth Avenue to the east; the first four tax parcels that front on the east side of North Broadway, north of Getty Square, and the tax parcels that front on the north side of Palisades Avenue, east of Getty Square to the intersection of Palisade Avenue, School Street, and Elm Street; the first two tax parcels on the west side and the first four tax parcels on the east side of Locust Hill Avenue north of the intersection of Locust Hill Avenue and Palisade Avenue; and the first four tax parcels on the west side and the first two tax parcels on the east side of Palisade Avenue north of the intersection of Palisade Avenue and Elm Street.

2. Existing Land Use

The Study Area comprises a total of 344 tax lots and contains residential, commercial, public, and religious land uses (See *Table II-1*, "*Existing Land Uses in the Study Area*", and *Exhibit II-3*, "*Existing Land Use*").

| Characteristic | Lots | Percentage | Area (Acres) | Percentage | | | | | | | |
|----------------------|------|------------|--------------|------------|--|--|--|--|--|--|--|
| Study Area | 344 | 100% | 75.75 | 100% | | | | | | | |
| Residential | 134 | 39% | 14.1 | 19% | | | | | | | |
| Commercial | 43 | 13% | 12.0 | 16% | | | | | | | |
| Community | | | | | | | | | | | |
| Service | 27 | 8% | 16.7 | 22% | | | | | | | |
| Industrial/Utilities | 25 | 7% | 3.0 | 4% | | | | | | | |
| Vacant Land | 94 | 27% | 20.0 | 26% | | | | | | | |
| Parking | 6 | 2% | 7.5 | 10% | | | | | | | |
| Road/Street/Hwy | 15 | 4% | 2.5 | 3% | | | | | | | |

Table II-1 Existing Land Uses in the Study Area

Source: City of Yonkers Parcel Data

The Study Area can be defined as "mixed-use" in nature. Residential and commercial land uses are distributed throughout the Study Area, but residential land uses predominate at the edges of the area, while commercial land uses are most prevalent in the central blocks, including Getty Square and vicinity, Main Street and around the intersection of Riverdale Avenue and Prospect Street. Public/quasi-public land uses, including community services, religious, government and recreation uses are also distributed throughout the Study Area. These include Yonkers City Hall, the U.S. Post Office, Yonkers Police and Fire Headquarters, and the Cacace Justice Center. Five religious uses and six benevolent uses, including the YMCA and Salvation Army, are found within the Study Area. According to tax parcel data, there are 94 vacant properties in the Study Area, with and without existing structures. Fifteen (15) parcels serve as public street rights-of-way, and 26 are identified as CDA urban renewal properties, 19 of which are vacant. Commercial uses in the Study Area include six auto-repair/service stations, 24 restaurant/retail businesses, and 13 office buildings.

With a total of 134 residential uses in the Study Area, multifamily is the primary residential use. Concentrations of two- and three- family residences are mostly found within the Hawthorne and Buena Vista area to the east of Metro North tracks; and within the blocks surrounded by Palisade Avenue to the north. Relatively few single-family uses exist in the Study Area. Large parcels of industrial land are predominantly found in the western sections of the Study Area along the riverfront.

Blight and Blighting Factors

In order to assess the presence of blighting factors, field surveys of the Study Area were conducted with visual inspections of lots, buildings and public improvements. Tax parcel data and ownership records and other public records were also researched. All lots and buildings were then classified by occupancy and use as: "occupied building," "underutilized building,"

"vacant building," "vacant lot," "underutilized lot," or "other" (See *Table II-2, "Occupancy and Use Classifications"*).

| Category | Lot/Building Characteristic |
|-------------------------|---|
| Occupied Building | Lot with occupied structure(s) in current use |
| Underutilized Building* | Lot with partially vacant structure(s) |
| Vacant Building* | Lot with vacant structure(s) |
| Vacant Lot | Lot is unimproved without structure(s) |
| Underutilized Lot | Lot is unimproved without structure(s) and being used for parking or vehicle storage |
| Other | Vacant lot with plausible explanation: recreational use, roadway right-of-way, urban renewal public space, etc. |

 Table II-2

 Occupancy and Use Classifications

* A building is deemed to be vacant if it is entirely vacant. If a building is only partially vacant, then it is deemed to be underutilized.

All buildings and lots were then assigned a grade of "good," "fair," or "poor" (See *Table II-3*, *"Building and Lot Condition Classifications"*).

| Bunding and Lot Condition Classifications | | | | | | | | | |
|---|---|---|--|--|--|--|--|--|--|
| Category | Building Characteristics | Yard or Lot Characteristic | | | | | | | |
| Good | Structurally sound, with evidence of recent or complete paint coverage; appearance of owner or tenant attention to the maintenance and care of the property | Vegetation and yard trimmed and clean; fences upright and in working order | | | | | | | |
| Fair | Structurally sound; requires paint or other aesthetic maintenance; some repair or renovations appear to be needed | Some yard maintenance needed; presence of some litter or unattended yard work | | | | | | | |
| Poor | Structurally unsound, such as sagging roof beams; unstable or settled, uneven foundation; broken glass, or doors, appearance of neglect | Dumping, junk, overgrown vegetation; standing water; informal vehicle access | | | | | | | |

Table II-3 Building and Lot Condition Classifications

3. Building Conditions

The field surveys reviewed physical conditions as well as occupancy, property uses, and intensity of current use. (See attached Photographs 1 through 32.) Of the 344 tax parcels surveyed, 232 (67%) have buildings situated on them. As shown on *Table II-4, "Summary of Building Conditions,"* of the 232 buildings 100 (44%) are in "fair" or "poor" condition, exhibiting disrepair and neglect, or lacking structurally sound supporting roofs, walls, or exhibiting significant visual deficits (See *Exhibit II-4, "Building and Lot Occupancy and Conditions"*). More specifically, 64 buildings (or 28%) are in "fair" condition, exhibiting disrepair and neglect; and 36 buildings (or 16%) are in "poor" condition. Of particular note were the properties in the most serious condition - vacant and collapsing residential and commercial buildings and multiple homes on single lots, with informal or unsafe-appearing entry stoops, yards that lacked a distinction between open space and vehicle parking areas and lack of formal vehicle access or lack of frontage on a public right-of-way.

As noted below, of the 232 parcels with buildings, 51 (22%) appeared to be vacant or partially vacant (underutilized). Commercial buildings with "for rent" or "for sale" signs and buildings vacant by appearance were in some cases in fair or good condition (*Table II-4*,

"Summary of Building Conditions").

The most severe building conditions were found to be concentrated in the core of the Study Area, but the entire area was found to contain properties in "fair" and "poor" condition. The following photographs illustrate the range of these conditions.

| Trans | Poor Condition | | | Fair Condition | | | Good Condition | | | Summary | |
|-------------------------|----------------|-----|------------|----------------|-----|------------|----------------|-----|------------|---------|------------|
| Туре | Count | % | % of Total | Count | % | % of Total | Count | % | % of Total | Total | % of Total |
| Occupied Buildings | 27 | 15% | 8% | 42 | 23% | 12% | 112 | 62% | 33% | 181 | 53% |
| Underutilized Buildings | 4 | 12% | 1% | 13 | 39% | 4% | 16 | 48% | 5% | 33 | 10% |
| Vacant Buildings | 5 | 28% | 1% | 9 | 50% | 3% | 4 | 22% | 1% | 18 | 5% |
| TOTAL | 36 | 16% | 10% | 64 | 28% | 19% | 132 | 57% | 38% | 232 | 67% |

 Table II-4

 Summary of Building Conditions

Source: Field Survey, Saccardi & Schiff, Inc. (8/15/06, 8/23/06 and 11/28/06)

The field surveys confirm that buildings and structures in the Study Area are predominantly deteriorated or unfit or unsafe for use or occupancy.

4. Vacant and Underutilized Properties

The Study Area contains 58 vacant parcels, totaling approximately 7.2 acres. (See Photographs 1, 2, 9, 10, 11, 12, 25, and 32 for examples of vacant and underutilized properties.) This represents 17 percent of the Study Area's 344 lots, or 9 percent by area (See *Table II-5, "Summary of Vacant Land"*). Forty lots are underutilized, functioning as surface parking or vehicle storage lots, including Chicken Island parking lot, which is the largest surface parking lot in the downtown area. These lots are underutilized, and comprise 23 acres, or 30 percent of the Study Area. Taken together, vacant and underutilized tax lots, and lots with underutilized (partially vacant) building total approximately 38.5 acres, or 50 percent of the Study Area land. In addition to these lots, there are 51 vacant or underutilized buildings. Therefore, of the 344 parcels in the Study Area, 149 (or 43%) are vacant or underutilized. When coupled with the buildings in fair and poor condition, the need for redevelopment in the Study Area is evident (See *Table II-6, "Summary of Blight and Blighting Factors," Exhibit II-5, "Property Conditions in Study Area," and Exhibit II-6, "Vacancy and Underutilization in Study Area"*).

| Туре | Poor Condition | | | | Fair Condition | | | Good Condition | | | | Summary | | | |

| | | | | | | | | | | | | TOTAL | 344 | 76.48 | 1.00 |

 Table II-6

 Summary of Blight and Blighting Factors (Area by Acres)

5. Lot and Yard Conditions

Some yards surrounding existing buildings exhibited dumping, lack of vegetation and landscaping maintenance, and other signs of neglect. Overall, few vacant lots were observed to be in "good" condition—these were mainly City-owned and maintained parcels, including public open space areas and other parcels fronting on the south side of Elm Street and on the south side of Nepperhan Avenue. As described in Table II-3, the lots that are classified as being in "poor" condition were found to contain dumping, junk, overgrown vegetation, standing water, and/or informal vehicle access. Yards in "fair" and "poor" condition tended to also contain buildings in "fair" and "poor" condition. In some cases, multiple vacant lots in "poor" or "fair" condition are adjacent to one another, compounding the conditions.

| Summary of Vacant Land | | | | | | | | | |
|------------------------|-------|------|-------|------------|--|--|--|--|--|
| Туре | Count | Area | Area% | % of Total | | | | | |
| Vacant Lots | 58 | 7.2 | 9% | 17% | | | | | |
| Underutilized Lots | 40 | 23 | 30% | 12% | | | | | |
| Other [*] | 14 | 1.5 | 2% | 4% | | | | | |
| TOTAL | 112 | 31 | 41% | 33% | | | | | |

Table II-5

Source: Field Survey, Saccardi & Schiff, Inc.

*As addressed in Table II-2, "Other" is defined by vacant lots with plausible explanation: recreational use, roadway right-of-way, urban renewal public space, etc.

The number of vacant and underutilized lots shows that a significant portion of the Study Area id comprised of unproductive lands.

6. Public Improvements

The existing infrastructure systems in the Study Area, including the water mains and combined storm and sanitary sewer lines are old, obsolete and inadequate for any comprehensive redevelopment program. The area suffers from water pressure problems and the combined sewer system overflows and causes capacity problems at the nearby Yonkers Sewerage Treatment Plant. This results in serious problems with untreated sewage entering the Hudson River and the Saw Mill River, which flows through a flume throughout most of the Study Area and is an untapped resource that could be vastly improved if daylighted as part of a redevelopment program.

Curbs and gutters and visible crosswalks are generally found to be in satisfactory condition in many locations such as those along the major thoroughfares of Nepperhan Avenue and the shopping district around Getty Square, but not along many of the smaller streets that comprise much of the Study Area. It was noted that in many areas sidewalks and curbs were in need of repair and fencing, and walls and other public/private boundaries were in disrepair. (See Photographs 1, 3, 4, 10, 11, 25, and 28.) The roads are in fair condition, but do to appear to need significant repair. The road system providing access to the Study Area is made up of busy roads with fast-moving traffic, and stands in contrast to the internal road network of smaller streets, many of which are fronted with residential and mixed uses buildings. Double parking and on-street loading add congestion to these narrow roads.

CONCLUSIONS

As summarized in Table II-5, nearly 33% of all lots and buildings are determined to be in "poor" condition. In addition, as shown in Table II-5, vacant and underutilized lots, and lots with underutilized buildings total approximately 50% (or 38.5 acres) of the Study Area. This confirms that the Study Area is characterized by a predominance of buildings which are deteriorated or unfit or unsafe for use or occupancy, and of vacant or underutilized lands (See *Exhibit II-7, "Substandard Conditions in Study Area*").

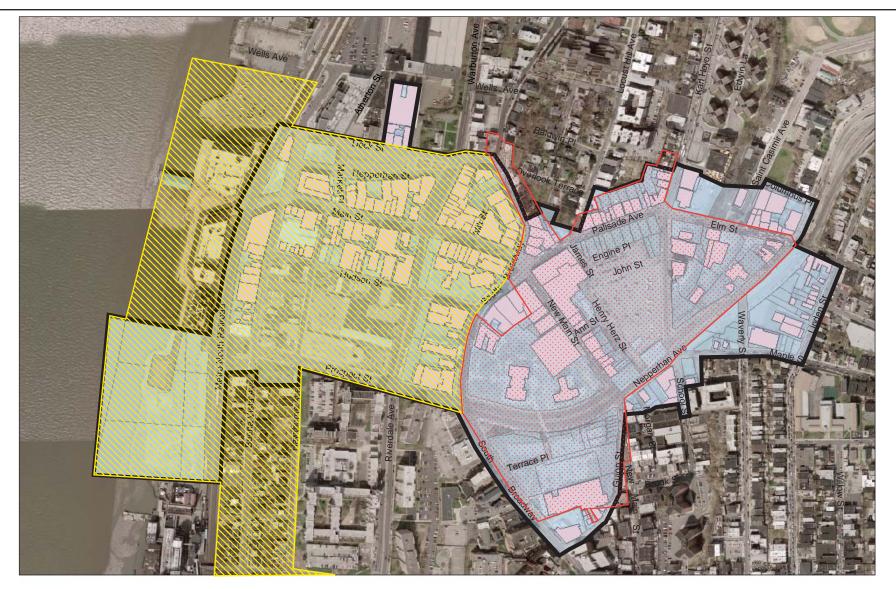

The Study Area is therefore a blighted area under the criteria set forth in the Municipal Redevelopment Law, and the existing conditions warrant the preparation by the City of a preliminary plan for a redevelopment project in the Study Area.

(1)

The area known as "Chicken Island," in the center of the Study Area, is deteriorated and has been an underutilized municipal parking lot in recent decades. Signs of deterioration include eroded and cracked pavement.

The single-story, shuttered building and fenced parking lot at the intersection of Buena Vista Avenue and Hudson Street is poorly maintained. In addition, the sidewalk and curbs are in poor condition as evidenced by cracking and jaggedness of the cement.

Two wood-frame residences remain on Hawthorne Avenue, with a shared garage in poor condition as evidenced by the sagging roof and unkept ground.

At the corner of Prospect Street and Hawthorne Avenue, a vacant lot is used for tandem parking. Next door is a residence in sound condition but with evidence of neglect, as seen by overgrowth and storage of an abandoned car on-site.

Vacant lots fronting on Prospect Street between Hawthorne and Buena Vista Avenues have collapsed fencing and dumping.

Adjacent to one of the two remaining residences on Hawthorne Avenue is a vacant lot which is overgrown and lacking adequate sidewalks.

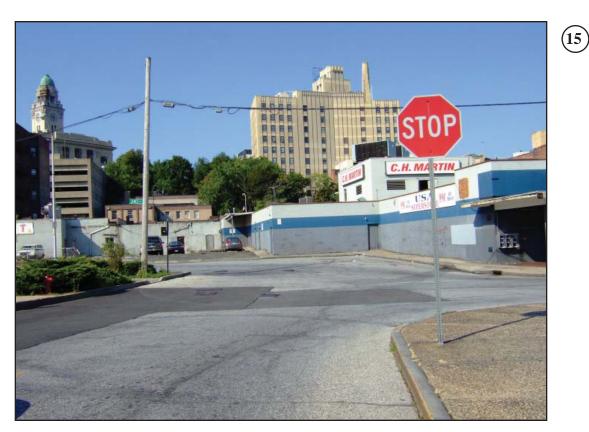

The yards of former industrial buildings on Buena Vista Avenue near Hudson Street are strewn with trash.

A commercial building on Riverdale Avenue is vacant.

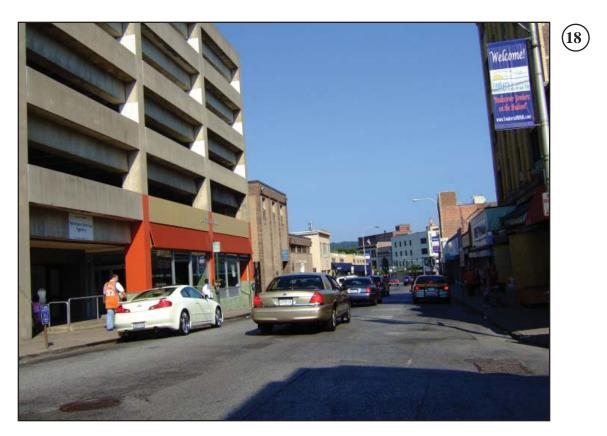

The surrounding properties at the intersection of John and James Streets are somewhat neglected as evidenced by the cracks in the building faces and unkept lot.

One-story retail buildings, a municipal parking garageand other uses front on New Main Street between Palisade and Nepperhan Avenues.

Guion Street lacks adequate sidewalks, and adjacent properties appear to be neglected. Portions of the sidewalks and properties are overgrown and the sidewalks contain cracks.

Properties on Morgan Street show signs of blight and deterioration as evidenced by overgrown lots and cracks in the siding.

School Street contains older industrial buildings, some vacant, with sidewalks and curbs in poor condition.

The block contained by Maple Street, Waverly Street and Nepperhan Avenue is comprised of two residences and vacant lots. Site conditions are poor with overgrown lots and junk stored on-site.

The parking lot at the intersection of Linden and Maple Streets is overgrown, and surrounding sidewalks and curbs are in poor condition. Sidewalks are overgrown and uneven.

A wood-surfaced bridge structure crosses the Saw Mill River off of New School Street behind the fire department headquarters. The bridge provides access to an isolated parcel that is used for parking and storage, and is unimproved.

31

Buildings fronting on Nepperhan Avenue, near the intersection with Elm Street, show serious problems. The building's facade contains significant damage and is deteriorated.

Small shuttered buildings on Riverdale Avenue are vacant and deteriorated, as evidenced by eroding siding and growth on the lot.

III. MARKET FACTORS

The SFC Project will include a mix of retail, office, hotel, residential and entertainment uses. Market factors for each use are presented in this section with an emphasis on the market for retail and restaurant uses, analyzing the effects of the proposed development on other shopping areas in Yonkers, given the trade area's purchasing power.

Retail Market Analysis

Retail Trade Areas and the Competitive Landscape

1. Consumer Markets and Trade Areas

The retail market demand analysis identifies two key trade areas that comprise the core group of consumers that will generate demand for goods and services at the SFC Project. The extent of each trade area is largely based on the potential scale of the SFC Project and the competitive landscape. The trade area analysis also reflects residential density, willingness to travel, physical barriers posed by the Hudson River and its bridges, and the north/south-oriented travel corridor in southern Westchester County. Specifically, the analysis considers the following factors to determine the extent of the trade areas:

- Number of households required to support the magnitude of retail development proposed;
- Amount of time consumers are willing to travel for specific retail offerings;
- Modes of transportation and transportation routes in the local and regional area (including consideration of traffic and congestion); and
- The competitive landscape, including the type and location of existing retail establishments available to consumers.

The trade areas for the SFC Project retail component are based on US Postal Service zip codes:

- Those zip codes, which include residents living within about a five-minute drive from the site, are defined as the trade area for convenience goods purchases. Convenience purchases include groceries, health care products, or other regularly-purchased goods.
- Those zip codes, which include residents living within about 15-minutes drive, excluding zip codes in White Plains and zip codes below 155th Street in Manhattan, are defined as the trade area for comparison goods. Comparison goods include electronics, clothing, sporting goods, or other goods for which shoppers are willing to travel further to get the right product or price.

Table III-1, "Trade Area by Retail Category" defines the extent of the trade area for each retail category considered by this analysis.

| Retail Category | Convenience Goods Trade Area | Comparison Goods Trade Area |
|---|---------------------------------|--------------------------------|
| Furniture and Home Furnishings Stores | \checkmark | \checkmark |
| Electronics and Appliance Stores | \checkmark | \checkmark |
| Building Material, Garden Equip Stores | \checkmark | \checkmark |
| Food and Beverage Stores | \checkmark | |
| Health and Personal Care Stores | \checkmark | |
| Clothing and Clothing Accessories Stores | \checkmark | \checkmark |
| Sporting Goods, Hobby, Book, Music Stores | \checkmark | \checkmark |
| General Merchandise Stores | \checkmark | \checkmark |
| Miscellaneous Store Retailers | \checkmark | |
| Foodservice and Drinking Places | \checkmark | \checkmark |

Table III-1Trade Area by Retail Category

Source: Economics Research Associates

a. Convenience Goods Trade Area

Those zip codes located closest to the SFC Project contain the households that are most likely to travel to the SFC Project for convenience retail. Convenience retail, typically found in neighborhood shopping centers, relies on households making frequent trips to purchase goods for day-to-day consumption. This distinction applies to three of the ten retail categories analyzed, including food and beverage stores, health and personal care stores, and miscellaneous store retailers (e.g., florists, office supply store, pet/pet supply stores).

b. Comparison Goods Trade Area

The Comparison Goods Trade Area is significantly larger than the Convenience Goods Trade Area and includes those households that are most likely to travel to the SFC Project for comparison purchases. Consumers are willing to travel longer distances to make purchases, which require a comparison of products and prices at a variety of stores. Seven of the ten retail categories considered by this analysis fit this description, including furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment stores; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; general merchandise stores; and foodservice and drinking places.

Trade Area Definition

Exhibit III-1, "Convenience and Comparison Goods Trade Areas" and *Exhibit III-2, "Convenience and Comparison Goods Trade Areas by Zip Code"* graphically depict the two trade areas analyzed as part of this retail market study. As shown, the Convenience Goods Trade Area consists of four zip codes near the SFC Project. The Convenience Goods Trade Area includes those zip codes located within approximately five minutes drive from the SFC Project. The linear nature of the Convenience Goods Trade Area reflects the north/south transportation corridor along the Hudson River.

The Comparison Goods Trade Area encompasses 38 zip codes within about 15 minutes drive from the SFC Project. Despite their proximity to the SFC site, zip codes in White Plains and zip codes south of 155th Street in Manhattan are excluded from the retail market analysis. White Plains residents are excluded from the trade area as consumers in this area will generally choose to do their shopping in downtown White Plains, given the availability of similar products. Households below 155th Street in Manhattan are excluded due the competitive retail landscape there and because these households have more limited access to private automobiles.

Exhibit III-3, "Spheres of Influence – White Plains and Yonkers" presents the SFC Project's trade areas in their locational context. The graphic depicts a sphere of influence for Yonkers and White Plains, based on a simple six-mile radius. As shown, the Comparison Goods Trade Area is tailored to exclude households living in zip codes that are fully within White Plains' sphere of influence.

Exhibit III-4, "Overlapping Trade Areas" presents the trade areas for retailers at Ridge Hill Village and the Cross County Shopping Center, as provided by leasing agents marketing these retail spaces. As shown, the trade areas for the Ridge Hill Village and Cross County Shopping Center are larger than the SFC Project's trade area. The SFC Project trade area is entirely within both the Ridge Hill Village and Cross County Shopping Center trade areas.

Table III-2, "Yonkers Market Sufficiency Test" provides the population density requirements for a number of top US retailers. The retailers included in Table III-2 are representative of the types of retailers that might be included at the SFC Project. However, this is not a tenant roster. The requirements show the population within a specified radius deemed necessary by the retailer to warrant selection of a site. According to Claritas, there are approximately 61,000 people within one mile, 201,000 people within three miles, 800,000 people within five miles, and 3.05 million people within 10 miles of the SFC Project area. These population counts are sufficient to make the SFC Project attractive to most retailers.

2. Shopping Center Overview

To better understand current shopping patterns in southern Westchester County, existing retail offerings were examined, with a focus on traditional shopping centers and mall-format retail. While development of a detailed inventory of retail space is beyond the scope of this research, the analysis relies on data from the International Council of Shopping Centers and CoStar Group to evaluate existing retail centers.

 Table III-3

 Major Retail Centers in Westchester County and the Bronx

Source: CoStar Group; International Council of Shopping Centers; Economics Research Associates

¹ Rentable Building Area in square feet.

a. Retail Centers in Yonkers

Cross County Shopping Center (Value and Mid-market Offerings)

Developed in 1954, Cross County Shopping Center was one of the first open-air shopping malls in the nation. The center is anchored by Macy's, Sears, a movie theater, and Super Stop & Shop supermarket. The center includes other national tenants, such as GAP, Express, and more recently, Old Navy. The Cross County Shopping Center is currently approximately 1.2 million square feet in size.

In February 2006, Brook Shopping Center LLC completed the Final Environmental Impact Statement (FEIS) detailing the proposed expansion of the Cross County Shopping Center. It is expected that the proposed expansion, which calls for 245,000 square feet of new retail and restaurant space, will be approved in the near future. Under the plan, Macy's will add 50,000 square feet and Sears will add 11,400 square feet. Additional improvements include a five-story parking garage containing over 1,900 spaces.

The Mall at Cross County (Value and Mid-market Offerings)

To the south of the Cross County Shopping Center is the Mall at Cross County. This mall, opened in 1986 and expanded in 1997, currently contains over 260,000 square feet of retail space. Tenants include Circuit City, TJ Maxx, Sports Authority, and National Wholesale Liquidators, as well as smaller-format retail stores including LensCrafters and GNC.

Central Park Avenue (Value and Mid-market Offerings)

Central Park Avenue in Yonkers is characterized by a typical commercial strip development pattern with a combination of strip-mall shopping centers and stand-alone stores. Surface parking lots are generally located between the roadway and the retail stores.

The Yonkers Gateway Center is the largest shopping center on Central Avenue in Yonkers. Located near the Greenburgh town line, the Gateway Center consist of roughly 500,000 square feet of space containing a combination of big-box tenants, such as Burlington Coat Factory, Best Buy, Levitz Furniture and DSW, as well as in-line tenants, including Radio Shack, Payless ShoeSource, and Hallmark. Also, there is a 23,000-square-foot, six-screen, United Artists cinema at the rear corner of the site.

Other significant centers along Central Park Avenue in Yonkers include Central Plaza and the Kohl's Shopping Center. Central Plaza consists of about 150,000 square feet of retail space. The center is anchored by a 17,500-square-foot, four-screen, Clearview Cinema and a Barnes and Noble Booksellers store. The Kohl's Shopping Center consists of about 175,000 square feet and includes Kohl's, Regency Furniture, Petco, and Pearl Vision.

Located just north of the Yonkers city line, the Midway Shopping Center is about 295,000 square feet in size. The center is anchored by Linens 'n Things and includes a CVS and The Door Store.

b. Retail Centers in White Plains

Downtown White Plains has emerged as a hub of retail activity for central Westchester County. Much of the retail space is located within several indoor shopping centers, including the Galleria at White Plains, The Westchester, and City Center at White Plains. Bloomingdales, Fortunoff, and Wal-Mart also have stores in White Plains.

The Galleria at White Plains (Mid-market Offerings)

The Galleria at White Plains is a 900,000-square-foot, mid-market shopping center that features anchor tenants including H&M, Macy's, Old Navy, and Sears.

The Westchester (Up-market and Luxury Offerings)

The Westchester is an 827,695-square-foot shopping mall with high-end retailers including Neiman Marcus, Nordstrom, Tiffany, Louis Vuitton, Coach, Mark Jacobs and Gucci, in addition to other tenants such as Abercrombie and Fitch, Restoration Hardware, and the Apple Store.

City Center at White Plains (Value and Mid-market Offerings)

City Center at White Plains is a 1.1 million-square-foot mixed-use project including national retail tenants such as Target, Filene's Basement, Circuit City, and Barnes and Noble Booksellers. In addition, there are destination restaurants including Zanaros and Legal Seafood as well as a 15-screen cinema.

c. Other Retail Centers in Westchester County

Cortlandt Towne Center (Value and Mid-market Offerings)

Cortlandt Towne Center is a 642,354-square-foot power center in Mohegan Lake that features an A&P supermarket and big-box retailers such as Home Depot, Linens 'n Things, and Wal-Mart. There is also a United Artists Cinema on site.

Jefferson Valley Mall (Value and Mid-market Offerings)

Jefferson Valley Mall is a 588,385-square-foot traditional shopping mall in Yorktown Heights that is anchored by H&M, Macy's, and Sears, in addition to Trademark Cinemas.

Stew Leonards (Mid-market Offerings)

Stew Leonards is a big-box supermarket located at a site near Austin Avenue, off of the New York State Thruway, in Yonkers. The 122,000-square-foot store is part of larger retail complex that also includes a 103,000-square-foot Home Depot and a 135,000-square-foot Costco.

Other Big-Box Retail Locations (Value and Mid-market Offerings)

Retail development near Weyman Avenue in New Rochelle, off of Route 95, includes Home Depot and Costco. In Mt. Vernon, retail development on East Sandford Boulevard, off of the Hutchinson River Parkway, includes Target, Best Buy, and TJ Maxx. d. Retail Centers in the Bronx

Bay Plaza (Value and Mid-market Offerings)

Near Co-op City, Bay Plaza is a 900,000 square foot shopping center comprised of bigbox anchors and a strip-mall-style corridor of smaller, in-line tenants. The center's anchor tenants include JC Penney, Big Kmart, and a Pathmark supermarket. Other major retailers include Marshall's, PC Richards, Toys "R" Us, Linens 'n Things, Modell's Sporting Goods, Staples, Barnes & Noble, and Old Navy. The shopping center also includes a 13-screen movie theater.

Parkchester Retail District (Mid-market Offerings)

Located in the Parkchester section of The Bronx, this shopping complex was built between 1938 and 1942 by MetLife as part of its Parkchester development. Macy's opened its first branch outside Manhattan at the site in the 1940s, and the department store remains the retail center's anchor tenant.

Bruckner Plaza Shopping Center (Value and Mid-market Offerings)

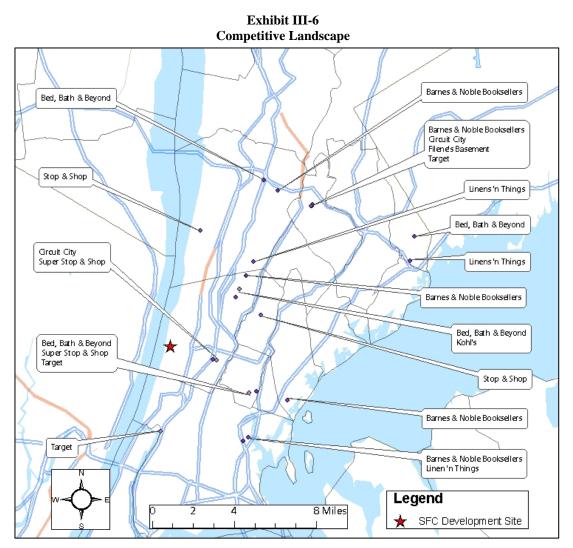

Bruckner Plaza Shopping Center is a 498,480 square foot center anchored by Kmart and Toys "R" Us. Other tenants include Modell's Sporting Goods, Old Navy, and Key Foods.

Other Big-Box Retail Locations (Value and Mid-market Offerings)

Target has a location on West 225th Street, near Riverdale, in the southwestern Bronx. Sears has a store near East Fordham Road, centrally located within the Bronx. Home Depot has two locations in the eastern Bronx, one to the north near Route 95 and the other to the south, near the Bruckner Expressway. In addition to the location at Bay Plaza, Marshall's has a store in the southwestern Bronx at River Plaza, near Route 87.

3. Competing Retailers

A map depicting the location of retailers that are likely to be tenants at the SFC Project shows that these retailers are not currently found in or around downtown Yonkers.

Source: Economics Research Associates

Retail Demand Analysis

The retail demand model relies on household spending and current retail sales data to calculate supportable retail square footage within the trade areas. The basic outline of the model is as follows:

- Project trade area spending potential in 2011;
- Estimate current trade area sales volume;
- Determine unmet spending potential;
- Evaluate sales productivity (sales per square foot); and
- Calculate supportable square footage from unmet spending potential.

4. Household Expenditure Potential

Table III-4, "Trade Area Households" presents historical and projected trends in household growth within the Convenience Goods Trade Area and the Comparison Goods Trade Area, 2000 through 2011. As shown, Claritas reports that there are currently about 53,000 households in the Convenience Goods Trade Area and almost 588,000 households in the Comparison Goods Trade Area. Based on the planned residential development projects in Downtown Yonkers presented in **Table III-5, "Planned Residential Projects in Downtown Yonkers**" it is estimated that the number of households in the Convenience Goods Trade Area will grow to over 55,800 by 2011.9 Based on analysis of demographic trends, Claritas projects there will be about 595,000 households living in the Comparison Goods Trade Area by 2011.

¹ Includes those planned residential projects in Downtown Yonkers with pending approvals.

² The Ashburton Avenue Redevelopment replaces 552 units of public housing with 797 new units. This table presents the net increase of 245 housing units attributable to this project.

⁹ The analysis assumes that the proposed development projects included in Table III-4 will be completed by 2011.

The analysis estimates the future retail expenditure potential of households in the trade areas (i.e., dollars available to be spent on the ten retail categories) using 2006 consumer spending data and the projected number of trade area households in 2011, and based on the conservative assumption that spending potential remains constant, in real dollars, in the future. By 2011, households in the trade areas will have the potential to spend approximately \$8.39 billion (2006\$) on retail purchases each year. *Table III-6, "Household Expenditure Potential by 2011 (2006\$)"* presents the average and aggregate household expenditure potential in each of the ten retail categories analyzed. As shown, the projections indicate that there will be over \$410 million in convenience-goods expenditure potential and nearly \$7.98 billion in comparison-goods expenditure potential by 2011.

5. Current Retail Sales

In order to determine market potential for new retail space, the retail demand model assesses current retail sales in the trade areas based on 2006 data from Claritas. *Table III-7, "Retail Sales in 2006"* presents retail sales in the Convenience and Comparison Goods Trade Areas in 2006. As shown, retail sales at food and beverage stores, health and personal cares stores, and miscellaneous retailers within the Convenience Goods Trade Area total about \$319 million each year. Retail sales at furniture and home furnishings stores, electronics and appliance stores, building material and garden equipment stores, clothing and clothing accessories stores, sporting goods, hobby, book, and music stores, general merchandise stores, and foodservice and drinking places within the Comparison Goods Trade Area total about \$5.14 billion annually.

| Retail Category | Retail Sales 2006 | | | |
|---|-------------------|---------------|--|--|
| Convenience Good Trade Area | | | | |
| Food and Beverage Stores | \$ | 201,626,346 | | |

Source: Claritas; Economics Research Associates

6. Leakage of Retail Sales

In order to determine the amount of unmet spending potential in the trade areas, household expenditure potential in 2011 is compared to existing sales within each retail category. The difference between expenditure potential and current sales (when expenditure potential exceeds current sales) represents the sales leakage that might be captured by new and existing retailers. *Table III-8, "Unmet Expenditure Potential by 2011 (2006\$)* presents the projected retail leakage from the Convenience Goods and Comparison Goods Trade Areas by 2011.

Table III-8Unmet Expenditure Potential by 2011 (2006\$)

| Retail Category | Expo | Aggregate xpenditure Potential Current Retail Sales (a) (b) | | Unmet Expenditur Potentia (c) = (a) - (b | |
|--|--------|---|----|--|---|

7. Sales Productivity

Adjusted unmet retail sales are converted to an estimate of supportable square footage using sales data regarding productivity per square foot, by retail category. The analysis relies on industry standards published in the Urban Land Institute's Dollars & Cents of Shopping Centers 2006. Low and high estimates of productivity show the range in sales per square foot that might be achieved at the SFC Project. The low estimates reflect the median sales productivity for regional shopping centers across the United States. The high estimate reflects the sales productivity premium achieved by the top tier (i.e., top ten percent) of US retail tenants. The retail market analysis relies on the midpoint estimates presented in *Table III-9, "Sales Productivity (Annual Sales Per Square Foot, 2006\$)* to calculate unmet demand for retail space.

| | US | | Upper |
|--|--------|----------|--------|
| Retail Category | Median | Midpoint | Decile |
| Furniture and Home Furnishings Stores | \$227 | \$326 | \$425 |
| Electronics and Appliance Stores | \$319 | \$458 | \$597 |
| Building Material, Garden Equip Stores | \$315 | \$452 | \$589 |
| Food and Beverage Stores | \$362 | \$520 | \$677 |
| Health and Personal Care Stores | \$439 | \$631 | \$822 |
| Clothing and Clothing Accessories Stores | \$312 | \$449 | \$585 |
| Sporting Goods, Hobby, Musical Instrument Stores | \$224 | \$322 | \$420 |
| General Merchandise Stores | \$158 | \$226 | \$295 |
| Miscellaneous Store Retailers | \$207 | \$297 | \$388 |
| Foodservice and Drinking Places | \$421 | \$604 | \$788 |

8. Estimate of Unmet Demand for Retail Space

Table III-10, "Optimistic Estimate of Unmet Retail Development Potential by 2011" and Table III-11, "Conservative Estimate of Unmet Retail Development Potential by 2011" present the optimistic and conservative estimates of unmet retail potential, respectively. The optimistic estimate assumes that all households in the trade areas have access to the SFC Project. The conservative estimate assumes that access to the SFC Project from outlying areas within the Comparison Goods Trade Area will require an automobile, thus reducing potential unmet expenditure potential and demand for retail space.

Both the conservative and optimistic estimates indicate that there is sufficient unmet demand for retail space to accommodate SFC Project retail and additional retail projects proposed within the trade areas. Additional retail development proposals within the trade areas include Ridge Hill Village (1.2 million square feet of retail), the Cross County Shopping Center expansion (245,000 square feet of retail), and the potential development on Tuckahoe Road (at the Mark Buick site) of 375,000 square feet of retail.

a. Optimistic Estimate of Unmet Demand for Retail Space

As shown in Table III-10, the projected spending leakage of approximately \$2.93 billion within the trade areas in 2011 indicates unmet demand for about 8.4 million square feet of retail space. This estimate is considered optimistic because it assumes that all households in the trade areas will have access to retail offerings throughout the trade areas.

b. Conservative Estimate of Unmet Demand for Retail Space

To develop a conservative estimate of supportable square footage of new retail space in the Trade Area, potential transportation access constraints were evaluated. Households within the Convenience Goods Trade Area have access to the SFC Project by foot, bicycle, automobile, or the Westchester County Bus System. However, it is anticipated that households located outside of the Convenience Goods Trade Area will generally use a private vehicle to visit the SFC Project, as public transit is more limited in outlying areas.

To account for varying access to the SFC Project, the conservative estimate of unmet demand for retail space relies on zip-code-level vehicle ownership data from Census 2000 to calculate that 47.8 percent of households within the Comparison Goods Trade Area will have access to the SFC Project. As shown in Table III-11, spending potential attributable to households without access to the SFC Project is excluded from the conservative estimate of unmet retail demand. Adjusting unmet expenditure potential to reflect access to an automobile reduces unmet expenditure potential to \$1.45 billion. This conservative estimate of unmet expenditure potential translates to unmet demand for approximately 4.1 million square feet of retail space.

Source: Claritas, Inc.; Economics Research Associates

¹ The conservative estimate of unmet spending potential reflects the conservative assumption that trade area households located outside the Comparison Goods Trade Area must have access to an automobile in order to visit the SFC site. The Convenience Good Trade Area is well-served by the Westchester County Bus System and thus residents within this Trade Area have convenient access to the SFC site. However, access to the SFC site from outlying areas within the Comparison Goods Trade Area will require an automobile. The conservative estimate of unmet spending potential relies on vehicle usage data from Census 2000 (zip code level) to determine the proportion of households that have access to the site from the Comparison Goods Trade Area.

9. Required Capture of Unmet Demand

Table III-12, "Required Capture of Unmet Retail Potential" presents the conservative and optimistic estimates of unmet demand for retail space in the trade areas, compares potential unmet demand to the proposed SFC Project retail program, and calculates what capture of unmet demand must be achieved to support the proposed program. As shown, proposed food and beverage stores at the SFC Project would need to capture about 70 percent of unmet demand from the Convenience Goods Trade Area. Comparison-goods stores at the SFC Project would need to capture between 5 percent and 30 percent of unmet demand from the Comparison Goods Trade Area, depending on the specific retail store type. Overall, the SFC Project retail program must capture between 7 percent and 14 percent of total unmet demand, across all retail categories.

Site characteristics, including proximity to residential populations and ease of access, as well as the current and future competitive landscape within the trade areas suggest that a significant share of the estimated unmet retail potential could be captured at the SFC Project. Assuming that the SFC Project retail component achieves a unique and attractive tenant mix and that the revitalization of downtown Yonkers elevates the visibility of the area, it is very reasonable to expect that the SFC Project could capture 70 percent of unmet demand in the Convenience Goods Trade Area and 30 percent of unmet demand in the Comparison Goods Trade Area.

It is anticipated that the convenience retail offerings at the SFC Project will attract a high proportion of households from the Convenience Goods Trade Area. The successful capture of unmet demand will result from the selection of retailers that are uniquely positioned in the market. That is, differentiation from existing retailers in the area will allow SFC Project convenience goods retailers to capture sales that would otherwise occur elsewhere. In addition, it is expected that SFC Project convenience goods retailers will target new households locating at the SFC Project and in downtown Yonkers.

Comparison retail will benefit from visitation to the proposed ballpark and cinema. These attractions will draw consumers from throughout the Comparison Goods Trade Area. Customers will dine and shop before and after events at the SFC Project. Further, the hotel component of the SFC Project will attract additional visitors that will make purchases at the Project's retail establishments. The retail offerings, in combination with the on-site entertainment and hotel, will create a vibrant destination that will attract more consumers than the retail would alone. Additionally, the retail component will provide a greater awareness and potential customer base for the ballpark and hotel.

The variety of activities (i.e., shopping, dining, event going, etc.) and the on-site lodging will encourage customers to spend more time at the SFC Project. The ballpark, restaurants, and hotel will keep the project area active during later evening hours, when other retail centers have closed for the day. The increased customer time spent at the SFC Project significantly improves the revenue potential of the retail establishments there.

The SFC Project will be a special place where the mix of uses creates a unique experience

not currently found in the New York metropolitan area. The diversity of offerings and the mix of uses will have broad appeal, thereby maximizing potential synergies (e.g., cross marketing) and patronage. As evidenced by the successful development of stadium projects around the US, a ballpark in downtown Yonkers, in combination with mixed-use development, will promote revitalization of the area.

In Columbus, Ohio, for example, a new sports franchise and an arena have been the drivers of a downtown revival. The Columbus project has been cited as an example of successful "mixed-use master planning that can result in a critical mass of sports, entertainment, commercial, and residential uses."¹⁰ In Columbus, "the creation of a residential neighborhood helped activate the Arena District 24/7 and increased traffic to the restaurants, entertainment venues, and service retailers."¹¹ "With restaurants, shops, and special events year round, the area is a magnet for people."¹²

It is anticipated that the SFC Project will act as a catalyst that improves public perception of downtown Yonkers. The SFC Project will build on redevelopment projects that have already begun on the waterfront in downtown Yonkers, including residential, retail, and office development. The revitalization of downtown Yonkers will increase the popularity area as a destination, thus increasing the potential for SFC Project retailers to capture sales. The amenities offered as part of the SFC Project, including the "riverwalk," hotel and the ballpark will enhance the area's competitive position, attracting additional visitors, as well as new residents and employees who will utilize the new retail facilities.

 Required Capture of Unmet Retail Potential

Source: Economics Research Associates

10. Retail Rents

Retail rents in Yonkers vary significantly based on locational factors and the characteristics of the space. Through an informal survey of real estate brokerages and leasing agents, it has been determined that asking rents for good- to high-quality retail space in Yonkers range from about \$30 to \$150 per square foot (net) annually.

- Lower asking rents were observed in downtown Yonkers, which has not historically been a shopping destination. Retail spaces ranging from about 2,500 to 25,000 square feet are available for about \$30 on Main Street.
- On Central Avenue in Yonkers, asking rents range from \$35 to \$50 per square foot annually. These retail spaces are contained within strip mall centers and range from less than 1,000 square feet to 2,500 square feet.
- At the Cross County Shopping Center, retail rents range from about \$65 to \$80 per square foot annually. An apparel retailer would pay about \$75 per square foot for a well-positioned 3,000 square-foot store. Larger-format tenants would pay about \$70 for an 11,000 square foot space.
- The highest asking rents in Yonkers are at Ridge Hill Village, which is slated to open in 2009. Rents there range from about \$65 to \$150 annually. Some retailers will also pay a percentage of their annual sales, in addition to the fixed rent. A typical retailer at Ridge Hill Village would pay about \$75 per square foot annually for a 3,000 square foot space.

Based on available information, retail rents of \$50 and higher could be achieved at the SFC Project.

• As discussed above, retail centers in highly competitive areas within Yonkers are

achieving lease rates of about \$75.

- Due to the a location off the most heavily traveled vehicular corridors in southern Westchester County, rents at the SFC Project will be slightly less.
- However, retail lease rates at the SFC Project will be significantly greater than current rates in downtown Yonkers.

It is anticipated that the proposed SFC Project will transform downtown Yonkers into an entertainment and shopping destination. The depth of the trade area, breadth of retail offerings, and potential for incidental shopping visits will make the SFC Project very attractive to a variety of retailers.

Other SFC Project Components

11. Office

Office uses within the Study Area are primarily limited to the upper floors of downtown Yonkers commercial buildings. The CBRE Market View for Westchester County (1st Quarter 2006) estimated that there is only 2.5 million square feet of office space in the "South" market segment that includes Yonkers as well as Bronxville, Larchmont, Mamaroneck, Mt. Vernon, New Rochelle, and Pelham. The total amount of space in this large geographic area is only 7.7% of the entire inventory in Westchester County. Much of the office space in the County is centered around the White Plains Central Business District and the area to the east of White Plains.

The leasing activity in Yonkers for the most part is dictated by corporate decision-making, which results in larger transactions. The vast majority of these larger spaces are located well beyond the Study Area in and around Executive Boulevard, approximately three miles north of the Study Area. The proposed SFC Project is expected to add 532,7000 square feet of new office space, including the relocation of existing City offices. Cushman and Wakefield reviewed the proposal development and opined that: "the commercial space planned by SFC will be successful due to Yonkers' exceptional location, strength of the market and ability to draw employees". See Appendix for two Cushman and Wakefield reports, including responses to specific concerns raised by the City's consultant.

12. Hotel

There are over 5,300 hotel rooms in full or limited service hotels throughout Westchester County. Approximately 35% are facilities with 100 to 200 rooms. Many are located near White Plains, Rye and Tarrytown, along the I-287 corridor. In Yonkers, there are three hotels, all located on Tuckahoe Road (beyond the Study Area): Ramada Inn (103 Rooms), Royal Regency (91 Rooms), Tuckahoe Motor Inn (82 Rooms). The proposed SFC Project includes a 110-150-room hotel to be located on the Cacace Center site. It is expected that the hotel would benefit from the downtown Yonkers location, in direct proximity to the City's government center where there is currently no existing competition. A market study was performed by Urgo Associates and is in the Appendix.

13. Residential

Yonkers enjoys an attractive location on the most historic river in the country. Located in Westchester, residents benefit from the multitude of County recreation facilities including parks, golf courses and beaches. The comparatively lower taxes also make Yonkers more attractive than other river towns. Yonkers schools, which have struggled due to lack of funds, have been improving year to year and will benefit further from an increased tax base, making this a negligible issue for new residents.

Additional market rate residential housing is needed in the downtown. The 436 condominiums planned on the waterfront at Palisades Point and the 950 units planned at River Park Center will start to fill this need. A report prepared by The Marketing Directors, Inc. concludes that "these homes will be absorbed prior to occupancy in a two-year pre-sale effort for each tower. They will enjoy the same success as Trump Tower in White Plains and Trump Plaza in New Rochelle." The sweeping river views and the surrounding parks, shopping and dining will help create demand for these much needed additions to the housing market. See Appendix for The Marketing Directors Inc. report.

According to Marketing Directors, Inc., young buyers will include professional singles who are priced out of the Manhattan market but want the proximity to the downtown center and the easy commuting via the nearby Metro North Railroad station. Professional couples, without children, will enjoy the services and amenities and the parks along the waterfront where they can cycle and kayak. Couples with small children will be drawn to the convenience of the downtown location. Finally, empty nesters who are ready to sell their large home but want to stay in Yonkers will see this as a welcome option. They will be drawn by the services, amenities and views.

The Appendix of this study includes a report from Economic Research Associates with respect to competitive projects, absorption, and other market issues.

14. Baseball Stadium

The SFC Project includes a 6,500 seat minor league ballpark at River Park Center and related support infrastructure (e.g., concession space, office and locker room facilities, maintenance and storage areas, etc.). The ballpark would be located on the roof of the main River Park Center "podium" building and would share some of the infrastructure components of the rest of the structure (e.g., parking facilities, ingress and egress access stairwells and elevators, stormwater and drainage controls, etc.). Additionally, the ballpark is being developed for alternative uses, such as concerts, fairs and festivals, and other public gatherings.

The economic viability of the ballpark is tied to the mixed-use nature of the SFC Project as well as the multiple uses of the facility for greater utilization beyond baseball games. Minor league baseball games compete as both alternatives to major league baseball games (in this case, the New York Yankees and Mets) and entertainment events such as movies, bowling and other family-focused offerings. Minor league baseball competes for patrons of sports events at a price point far below that of many of its competition. The Yankees ticket price

for mid-level seats range between \$50-90 per ticket; a baseball ticket in Yonkers should be around \$10. Minor league baseball's summer-time, outdoor offering is designed as an attractive alternative to similarly priced indoor family activities such as movies, bowling, etc.

The ballpark at River Park Center is positioned for economic success because of the density of the surrounding population, the mixed-use design of the River Park Center site, and the non-baseball events envisioned for the facility. Yonkers has demonstrated success attracting large audiences to events in its downtown (e.g., annual Riverfest festivals, Independence Day fireworks, and ethnic/season parades) and is adding the infrastructure (e.g., improved road network, ample public parking) as part of the SFC Project to support the success of the stadium.

The proposed ballpark will have 6,500 seats, including luxury suites. In addition, the facility will offer food services and retail opportunities. As discussed in detail in Section III.I of the DEIS, Economic Research Associates relied on data provided by Westchester Baseball, LLC (the anticipated operator of the ballpark) to estimate the potential economic and fiscal impact attributable to the proposed ballpark.

The team owned and operated by Westchester Baseball LLC will be a member of the Atlantic League of Professional Baseball Clubs, Inc. ("Atlantic League"). The league is headquartered in Camden, New Jersey and consisted of eight teams in the 2007 season:

- Bridgeport Bluefish Stadium: Harbor Yard (capacity: 5,300) Bridgeport, Connecticut www.bridgeportbluefish.com
- Camden Riversharks Stadium: Campbell's Field (capacity: 6,425) Camden, New Jersey www.riversharks.com
- Lancaster Barnstormers
 Stadium: Clipper Magazine Stadium (capacity: 6,200+)
 Lancaster, Pennsylvania
 www.lancasterbarnstormers.com
- Long Island Ducks Stadium: Citibank Park (capacity: 6,002) Central Islip, New York www.liducks.com
- Newark Bears Bears & Eagles Riverfront Stadium (capacity: 6,200) Newark, New Jersey

www.newarkbears.com

- Somerset Patriots Commerce Bank Ballpark (capacity: 6,100) Bridgewater, New Jersey www.somersetpatriots.com
- Southern Maryland Blue Crabs Stadium: Regency Furniture Stadium (capacity: 6,000) Waldorf, Maryland www.somdbluecrabs.com
- York Revolution Stadium: Sovereign Bank Stadium (capacity: 5,200) York, Pennsylvania www.yorkrevolution.com

Westchester Baseball LLC has an ownership interest in the Bridgeport Bluefish. The financial assumptions included below are based in part on the operating experience of the Bridgeport Bluefish as well as the unique market conditions of Yonkers.

In addition to the operating experience of Westchester Baseball LLC, the Redeveloper partnership includes the owner/operator of the Newark Bears team (the Fidelco Group). The financial assumptions included below are also based in part on the operating experience of the Newark Bears as well as the unique market conditions of Yonkers.

Revenue for a typical Atlantic League minor league team comes from a variety of sources. In addition to the ticket sales from spectators, revenue is derived from food, beverage and merchandise sales to game attendees. Sponsorship serves as a key revenue source; advertising on the stadium scoreboard and billboards, promotions and print advertising all contribute to revenue. Additionally, revenue can be derived stadium naming rights and stadium rental income for other events.

Operating expenses for a minor league baseball team are similar to a traditional business. A team has administrative costs associated with operating a business (office, insurance, IT/telephony, etc.); facilities expenses tied to the operations of a stadium; baseball operating including travel expenses, salaries, wages, and other employee-related costs; and rent payable for the use of the baseball stadium.

The revenue and expense assumptions in the projections detailed below are a compilation of the experiences of Westchester Baseball LLC, the Fidelco Group, and third-party sources of information specified in the table and text.

The ballpark will host 68 minor league home games each season. The 2008 Atlantic League schedule calls for each team to play 140 games (70 home dates and 70 road dates). In addition, it will support other events such as college and high school-level games, youth

clinics, fantasy camps, and concerts. There will be approximately 50 of these other events each year. Westchester Baseball LLC estimates that an average of nearly 4,900 home game tickets will be sold to each game. This average game attendance assumption is supported by 2007 figures from the Atlantic League teams results. Other events will average roughly 500 ticket sales each (e.g., concerts, college/high school events, etc.). In sum, Westchester Baseball, LLC anticipates that over 354,000 tickets will be sold for baseball games and other events at the proposed ballpark. These projections are consistent with the general operating results of other Atlantic League teams.

Westchester Baseball, LLC estimates that stadium-related revenues will total nearly \$7.4 million, annually. These revenues include approximately \$3.1 million in revenue from home game ticket sales, \$2.1 million in revenue from food concessions, \$1.0 million in revenue from advertising, \$500,000 in revenue from merchandise sales, \$300,000 in revenue from parking, \$300,000 in revenue from the sale of tickets to other events, and \$40,000 in revenue from television and radio contracts.

Westchester Baseball, LLC estimates that operating expenses (excluding yet-to-bedetermined lease payments) will be about \$6.0 million, annually. These costs include salaries paid to players, managers, and trainers; full-time administrative staff members, maintenance staff, and grounds keepers; and part-time security personnel, food service workers, and ticket agents. Operating costs also include materials and supplies as well as the cost of goods sold.

In addition to on-site revenue, the ballpark will support additional revenue generation in Westchester County. In particular, visiting umpires and teams will spend money at local hotels and restaurants. In total, Westchester Baseball, LLC projects that umpires will add \$24,000 in spending and visiting teams will add \$93,000 in spending within Westchester County each season.

15. Parking

Please refer to III.E.1 of the SFC Project DEIS for detailed discussion of parking issues related to the SFC Project including parking supply and demand factors and utilization of shared parking concepts to establish the number of parking spaces appropriate for each land use. The proposed parking structures have not yet been designed; however, cost estimates per space have been developed by the Redeveloper and the City's outside consultant. The potential impact of any green building requirements or standards for parking structures have not been assessed, but are generally considered higher that the costs estimates developed by the Redeveloper and City's consultant.

IV. FINANCIAL CONSIDERATIONS

Estimated Cost for Public Infrastructure and Public Parking

A detailed breakdown of the estimated costs for the construction of the public infrastructure and improvements and public parking proposed to be financed through the issuance of tax increment bonds is attached hereto as Appendix E.

Necessity for Tax Increment Bond Financing

Tax increment bond financing will enable the City of Yonkers to provide the public improvements and public parking that are necessary to attract major private sector investments in the Study Area. Although the majority of the Study Area is already designated as urban renewal area, the Study Area suffers from continued disinvestment. Public infrastructure in the Study Area continues to deteriorate and become obsolete. Some recent efforts to renew the area near the Metro-North Railroad station have realized positive results. However, this re-use/redevelopment is not of sufficient scale to induce the comprehensive redevelopment of the Study Area as a whole as envisioned by the City in its urban renewal and planning studies.

The Redeveloper has informed the City that in the absence of tax increment financing for the construction of public improvements and infrastructure, the SFC Project would not be economically viable and would not be developed.

Tax Increment Bond Financing without County Participation

If the County of Westchester does not participate and the incremental additional County property tax revenues generated by the SFC Project are not devoted to bond debt service, then the amount of bonding will be adjusted so that debt service can be supported solely from the City tax increment and the revenues from the public parking at the SFC Project.

Risk to the City

The tax increment bonds would not be backed by the full faith and credit of either the City or the County, and are not general obligation bonds. The tax increment bonds would be payable from, and secured by, the incremental additional real property taxes generated by the SFC Project (and as a result of the increased value of any other properties in the Study Area improved after the City Council and County Board of Legislators authorize the allocation of the Study Area tax increment to bond debt service), and the revenues of the public parking facilities constructed with the bond proceeds. The bond underwriters may require the Redeveloper provide additional security to enable the sale of the bonds in the market. However, in no case will the general revenues of the City or the County be pledged to the repayment of the bonds.

Bond Issuance, Debt Service and Market Value Projections

The Redeveloper has requested that the City issue tax increment bonds in the amount necessary to cover the costs of construction of public infrastructure, improvements and parking and bond issuance and related financing costs (including capitalized interest and a reserve fund), currently estimated to total approximately \$186,903,000. The amount of initial annual debt service on this

amount of bonds is estimated to be \$11,786,438,¹³ and would increase to approximately \$19,593,563 in the 30th and final year. The fund to pay the debt service on the bonds will be comprised of approximately 75% of the incremental additional real property tax revenue to the City and County¹⁴ generated by the SFC Project (i.e., the amount of additional tax generated by the increased assessed value of the Project above the current "base assessed value" of all of the SFC Project sites except Larkin Plaza) and the revenues from the new public parking facilities, which are estimated to be approximately \$2,957,765 in the first year, rising to approximately \$5,048,568 in the final year.

Attached as Appendix D are documents entitled "Phase I – City of Yonkers – TIF Bond Projections No.23A and 23B" (the "Bond Projections"). Among other things, the Bond Projections show sources and uses of funds and bond issuance assumptions, debt service projections, market value and property tax projections and public parking net operating income projections. The Bond Projections show that based on conservative assumptions regarding bond maturity, bond coupon (interest) rate, reinvestment rates and other factors, the debt service on the requested bond amount can be covered by 75% of the City and County tax increment and the public parking revenues. The Bond Projections also show that the net revenue to the City (25% of the tax increment plus the surplus over and above the 75% needed to service the debt, but not including a) the tax revenue attributable to the "base value" in the project area, or b) any tax increment which might be generated by any other improved property in the project area) ranges from \$2,359,479 in the fourth year after bond issuance and rises to \$11,443,142 in the next to last year (with County participation in the TIF).¹⁵

Tax Rate Neutrality

The bonds will be structured so that the City has no moral obligation to bond holders. A moral obligation may arise when an issuer makes a promise to bond holders that it will pay the debt from sources of funds other than project funds (in this case, the tax increment revenues and public parking revenues) even though the obligation is otherwise not legally enforceable.

To ensure that no moral obligation arises, the bonds will include specific disclosure to the buyers that the bonds are not backed by the full faith and credit of the City and that the buyers of the bonds will be able to rely only on project funds for payment of the debt. The bonds will be sold to sophisticated institutional investors who understand the financial risk, are able to evaluate and manage the risk, and for whom the risk is appropriate. These investors typically have billions of dollars of assets and are therefore actually in a better position than the City to assume this risk. In these circumstances, there is no moral obligation for the City to protect the investors.

Other local issuers typically address the issue of a potential moral obligation in the same manner; that is, by structuring and selling the bonds in such a manner that there was express or implied promise by the issuer to pay the debt.

¹³ This is the "gross" annual debt service payment (i.e., before applying debt service reserve fund income and income from operations. Although debt service schedules are uncertain at this point, it is expected that the first payment of debt service from City revenues and not from capitalized interest would be 3 and ½ years after issuance, i.e., after the Project is constructed and has begun operating. Interest expense during the construction period would be capitalized.

¹⁴ As previously indicated, Westchester County participation in "joint undertaking" will be requested, and the County will be asked to pledge 75% of its tax increment to the repayment of the City bonds.

¹⁵ The surplus is approximately \$27,290,265 in the final year because net debt service in that year is significantly less (approximately \$206,857).

Comparable TIF Projects

Table IV-1 presents several examples of tax increment financing projects similar in scale to the scale of the proposed SFC Project and the estimated amount of bonds:

| Project | Location | TIF Bonds Amount | Project Value |
|--------------|-----------------------|-------------------------|---------------|
| Westport | City of Baltimore, MD | \$120 million | \$1.2 billion |
| Harbor Point | City of Baltimore, MD | \$124 million | \$821 million |
| Steel Point | Bridgeport, CT | \$190 million | \$1.5 billion |
| Harbor Point | Stamford, CT | \$155 million | \$2.3 billion |
| | | | |

Table IV-1Comparable Projects with TIF Bonds

Source: MuniCap, Inc.

Project value is used as a proxy for total investment, as total investment is not readily available for all projects. The amount of tax increment invested will vary by project as a result of other revenues applied to the bonds (e.g., it is proposed here that public parking income will pay for about 28% of the bonds), other public investment, the type of investment (for example, on-site, off-site, general public facilities, project specific facilities), and extent of distress of the area.

TIF Projections

The projections from in Appendix D assume an interest rate of 6.25%. The interest rate environment has been dynamic recently, with frequent fluctuations and a lack of stability in rates, which makes it difficult to estimate the rate at which the bonds will be sold.

The interest rate will not be largely affected by the City of Yonkers financial history, since the City is not backing the bonds and bond holders will not be looking to Yonkers to repay the bonds. The location of the project in Yonkers will be a much more important issue, and this location will be viewed as a premier location, given the proximity to New York City and the lack of supply and expense of housing in the market. Key credit issues will include:

- The feasibility of the SFC Project, including the location of the SFC Project, status of permitting, contamination issues, and other issues that may affect the feasibility of the SFC Project;
- The development team, its experience, financial resources, and ability to make the SFC Project happen;
- Other investment in the SFC Project that will be subordinate to the bonds, such as Redeveloper's equity and other financing;
- The value of the property compared to the bonds supported by the property;
- The structure of the financing; and
- Tax collection procedures and collection history.

The assumed rate of 6.25% is high by historical standards for this type of bond issue and expected credit profile of the SFC Project. However, this rate should be appropriate for the

current market, given pricing on other recent tax increment bonds in the market. It is impossible to know what the state of the market will be at the time the bonds will be sold.

Project Risk Analysis and Timing Issues

The potential of the City having a moral obligation to pay the debt was addressed in the preceding section regarding "Tax Rate Neutrality." As previously indicated, there will be no promises made to the buyers of the bonds suggesting the City will be responsible for repaying the bonds in the absence of sufficient project revenues. To the contrary, the buyers of the bonds will be explicitly informed that the City will not be responsible for repaying the bonds if project revenues are insufficient.

The proposed tax increment bonds will be sold to sophisticated institutional buyers for whom the risk is appropriate. These buyers look for bonds with higher risk for the opportunity to earn higher yields. They buy these types of bonds because they are in a position to manage the risk, much like an insurance company that receives a premium to provide fire insurance. The investors do not expect the bonds to be risk free; they understand they are receiving additional compensation for taking the risk associated with the bonds.

V. AFFECTS ON OTHER PROPERTIES

Basis for Study Area Boundary

The Study Area boundary has been drawn to encompass the SFC Project and other proximate areas that are blighted under the criteria set forth in the Municipal Redevelopment Law and that would benefit from the public improvements proposed to be financed by tax increment bonds. It is possible that there may be additional development within the Study Area that results in an additional incremental tax revenues that could be utilized for bond repayment. However, to be conservative, the financial analyses and projections presented in the Appendix of this report are based solely on the anticipated revenues from the SFC Project.

Property Taxes and Rates

Establishing a redevelopment project in the Study Area will not cause assessed values of properties in the project area to be increased unless and until a property is improved, as would be the case for any property not located in the Study Area, and whether or not tax increment financing is implemented. Assessed values in the Study Area will be determined by the City assessor in accordance with State law based on the same methodologies and criteria applied to property outside of the Study Area. The mere fact that a property is located in the Study Area is not a basis for reassessment under applicable State law.

Eminent Domain

Under Section 970-f(j) of the Municipal Redevelopment Law, a municipality that establishes a redevelopment project may acquire property for project purposes through condemnation (the exercise of the power of eminent domain). However, the establishment of a redevelopment project does not, by itself, increase the threat that any property would be condemned. With respect to the Study Area, it should be noted that the City already has the power to condemn the vast majority of the properties in the Study Area that are also located in the Getty Square Urban Renewal Plan area and Riverview Urban Renewal Plan area.

Secondary Displacement

The DEIS for the SFC Project includes a socio-economic analysis that evaluates potential displacement of residential and commercial uses in the Study Area. There is no eminent domain contemplated and therefore no direct residential or commercial displacement by the City or any other governmental entity. The private purchase of property by Redeveloper will, however, result in the displacement of 22 dwelling units and 32 businesses. In addition, it is recognized that some secondary displacement may occur, but it would not be significant given the overall demographics of the Study Area, on-going City initiatives (e.g., planning study for Nodine Hill), and certain mitigation measures, including:

• The provision by the Redeveloper of affordable/workforce units equal to 6% of the total number of residential units at the SFC Project; either new affordable units will be constructed, or the Redeveloper will contribute equivalent value to an affordable housing fund to assist in the rehabilitation of housing and/or storefronts in the immediate vicinity of the proposed development.

- The preparation by the Redeveloper of a study, in conjunction with the Downtown Business Improvement District, of recommended business marketing and management strategies and techniques that will help enable existing retail and service establishments increase business activity as a result of their proximity to the proposed development.
- Patterned after a similar program developed in New Rochelle, the Redeveloper will create an employment initiative for construction workers, focusing on pre-apprenticeship training. This program will be designed to help local residents participate in various aspects of the construction program in downtown Yonkers.
- Many of the 13,000 direct and indirect construction jobs and 5,000 direct and indirect permanent jobs resulting from the development will be filled by Yonkers residents. The permanent jobs will include positions in management, office, hospitality, retail sales, restaurant, entertainment and services.
- Continued support by the Redeveloper for public services organizations. In 2006, the Redeveloper and its related entities funded an extensive number of community organizations in Yonkers that needed assistance in their efforts to address a variety of issues in the City. Among many others, these included the YMCA, YWCA, American Red Cross, Hudson River Museum, Beczak Environmental Education Center, Yonkers Public Schools, Family Service Society, Groundwork Yonkers, Inc. My Sister's Place, Yonkers Community Action Program and Nepperhan Community Center, Inc.

VI. PRELIMINARY PLAN

As more fully set forth in Sections I through V, the Study Area is a "blighted area" within the meaning of the Municipal Redevelopment Law and a redevelopment project in the project area (proposed to be the SFC Project) in the Study Area is feasible. In 2007, the City Council adopted a resolution selecting the Study Area as a "project area" for redevelopment and authorizing the preparation of a preliminary plan for the redevelopment project.

Under Municipal Redevelopment Law Section 970-e, the preliminary plan must include: (a) a description of the boundaries of the project area; (b) a general statement of the land uses, layout of principal streets and population densities and standards proposed as the basis for the redevelopment of the project area; (c) a statement of how the purposes of the Municipal Redevelopment Law would be achieved by the redevelopment; (d) a description of how the preliminary plan conforms to "Connections," the comprehensive plan of the City; (e) a general statement of the impact of the project on residents of the project area and the surrounding neighborhood; and (f) a statement of why redevelopment of the project area would not be undertaken were it not for the purposes and provisions of the Municipal Redevelopment Law (i.e., in the absence of tax increment financing). The preliminary plan for the proposed redevelopment project is set forth below.¹⁶

A. Boundary Description

The boundaries of the project area are the same as the boundaries of the Study Area shown on *Exhibit II-1, "Proposed Municipal Redevelopment Project Area Boundary,* and are described in Section II.A.1.

B. Proposed Land Uses, Traffic Circulation and Redevelopment Standards

The City proposes that the SFC Project be developed as the first phase of the redevelopment project in the project area.

As discussed in detail in the DEIS, the SFC Project is a proposed mixed-use development, with residential, retail, restaurant, hotel, office, entertainment and recreational uses, including a minor league ballpark. The total number of proposed dwelling units is 1,386 with 950 units at River Park Center and 436 units at Palisades Point. The total square footage of non-residential uses is approximately 1.3 million square feet.

Palisades Point is located on the Hudson River waterfront on a site long identified by the City for private mixed-use residential and commercial redevelopment under the City's Riverview Urban Renewal Plan, and which is also identified for redevelopment in the Master Plan & Design Guidelines for the Yonkers Downtown Waterfront approved by the CDA on December 16, 1998 and by the City Council on April 17, 1999 (the "Waterfront Master Plan"). To the immediate north of the Palisades Point site is the Schrimshaw House, a waterfront condominium development. To the east is the Metro-North Railroad tracks and beyond the tracks, a mostly residential community along Buena Vista Avenue. To the south of Palisades Point is the American Sugar Refinery, Inc. plant, an industrial facility.

¹⁶ The preliminary plan incorporates Section I through V, above, by reference.

Palisades Point is proposed to be approved as a specially permitted Planned Urban Redevelopment ("PUR"). A PUR special permit must be approved by the Planning Board and City Council, based on a "comprehensive development plan" for the proposed use. The approval of a PUR supersedes the use and dimensional regulations of the zoning district in which the use is located. The Waterfront Master Plan is proposed to be amended to conform to the PUR special permit ultimately approved by the Planning Board and City Council.

In contrast, the proposed mixed-use development at the River Park Center and Cacace Center sites will require amendments to the existing regulations of the CB-Central Business and GC-Government Center Districts to allow the range of uses proposed (e.g., the ballpark and housing are currently not permitted in the CB District), and also to allow greater density and building height than currently permitted in certain instances. The River Park Center and Cacace Center sites are subject to the Getty Square Urban Renewal Plan. The Getty Square Urban Renewal Plan is proposed to be amended to conform to the amendments to the regulations of the CB District.

Although the areas surrounding the River Park Center and Cacace Center sites are currently mixed-use in character, the SFC Project, with the "riverwalk" to be created by daylighting the Saw Mill River, ballpark and two 50 story residential towers, will become the most prominent land use in the area. Similarly, the two 25 story buildings at Palisades Point, along with the expansive publicly accessible open space to be preserved along the Hudson River, will become a dominant land use in that portion of the City.

In order to provide access to the SFC Project development sites, road and intersection improvements are planned. Among these are a new one-way routing of streets that serve the multiple access points for River Park Center; a new bridge across the Metro-North Railroad tracks leading into the Palisades Point site and other riverfront parcels; and expanded southbound access from the Saw Mill River Parkway to Yonkers Avenue. A trolley is also proposed, connecting the development sites with the Yonkers Railroad Station. Traffic circulation and proposed road and intersection improvements are discussed in detail in the DEIS.

The proposed land use controls and redevelopment standards for the redevelopment project (including the SFC Project) are: (1) the regulations of the CB District and GC District, as they are proposed to be amended; (2) the regulations of the DW District; (3) the Riverview Urban Renewal Plan; (4) the Getty Square Urban Renewal Plan, as proposed to be amended; and the Waterfront Master Plan, as proposed to be amended. Proposed land use controls and standards and densities of development are discussed in detail in the DEIS.

As shown on *Exhibit II-1*, the project area is also proposed to include other parcels of property in downtown Yonkers not currently proposed for private redevelopment as a part of the SFC Project. These parcels are in the CB District, GC District and the DW-Downtown Waterfront District of the City.

C. Statement of Purposes

As more fully set forth in Sections I through V, the Study Area is a "blighted area" within the meaning of the Municipal Redevelopment Law. The establishment of a redevelopment project in the project area and the development of the SFC Project would alleviate blighting conditions, increase spending in the downtown, increase sales and other tax revenues to the City, and provide significant job opportunities. The establishment of a redevelopment project in the project area would be beneficial to the general welfare of the City and would effectuate the purposes and promote the objectives set forth in Section 970-b of the Municipal Redevelopment Law. As the first phase of the redevelopment project, the SFC Project will bring new commercial and residential uses to the downtown thereby revitalizing and strengthening the area and preventing further deterioration of the heart of the City.

D. Relationship to the City's Comprehensive Plan

The proposed SFC Project would be the first phase of the redevelopment project. The SFC Project is consistent with "Connections," the City's recently adopted Comprehensive Plan. The overall "theme" of *Connections* is to relate and connect plan proposals to the City's history, to its place in the region, to its neighborhoods, economic centers, parks and natural resources, and to its transportation systems and community facilities. The SFC Project meets the goals of *Connections*, which calls for the City to:

- Strengthen shopping areas, including Getty Square
- Solidify partnerships with the real estate community
- Increase the amount of green space and formalize visitors along the waterfront
- Coordinate development planning with downtown planning efforts
- Explore new opportunities for city services and facilities (e.g., Larkin Plaza, Fire Department Headquarters)
- Provide affordable homeownership opportunities

The SFC Project is also consistent with the goals and objectives of the Riverview Urban Renewal Plan and is generally consistent with the goals and objectives of the Getty Square Urban Renewal Plan, objectives that have largely not been achieved over the last thirty years. However, the two residential buildings at Palisades Point are not consistent with the building height and density described in the Waterfront Master Plan. The Waterfront Master Plan is proposed to be amended to accommodate the proposed plan for Palisades Point.

E. Neighborhood Impacts

It is anticipated that the redevelopment project will be the catalyst that will bring the longawaited revitalization of downtown Yonkers to fruition. Although some notable redevelopment has occurred along the Hudson River and nearby portions of Main Street, most of the City's vision for the downtown as expressed in Connections, the Riverview Urban Renewal Plan, the Getty Square Urban Renewal Plan and the Waterfront Master Plan has not been realized.

A major destination retail facility, an expanded Hudson River waterfront esplanade and public open space area, the daylighting of the Saw Mill River in the downtown, and a minor league ballpark have been eagerly anticipated by City officials and residents. These attractions, along with the restaurant, office, hotel and residential uses, will bring existing

and new residents, shoppers and visitors together in downtown Yonkers, and will help induce the additional development activity that has been envisioned by the City.

In order to respond to potential growth in the downtown, the City has undertaken several initiatives to make certain that surrounding areas are improved. These actions include existing and proposed master plans for the nearby Nodine Hill, Ashburton Avenue, Ravine Avenue and Alexander Street areas. The Nodine Hill and Ravine Avenue plans identify potential opportunities for affordable infill housing and for rehabilitation of existing housing.

The Ashburton Avenue plan includes a HOPE VI component, with new housing affordable replacing the Mulford Gardens public housing complex.

In addition to these efforts, the City Council has required the Redeveloper to prepare, on behalf of the City Council, a conceptual plan for the redevelopment of additional areas in downtown Yonkers including the balance of the central Hudson River waterfront, the Alexander Street area, the Ludlow area and the Nepperhan Valley industrial area. The conceptual plan calls for additional housing, industrial development, and open space including a continuous publicly accessible open space and esplanade along the Hudson River.

Palisades Point is located on vacant land owned by the CDA. River Park Center and Cacace Center are proposed to be developed on private land already acquired or being acquired by the Redeveloper and land to be acquired from the City and CDA, including City-owned buildings, parking facilities and streets. No condemnations are proposed to assemble the SFC Project development sites.

No existing residences will be displaced as a result of the SFC Project. Secondary displacement is not anticipated given the City's efforts in areas like Nodine Hill where plans are being devised to strengthen the neighborhood and create new affordable housing opportunities. In addition, The SFC Project will also contribute to the affordable housing stock of the City, either through the construction of affordable units, or through contribution to a fund to be used to facilitate infill development or rehabilitation of existing residences within the downtown area.

F. Need for the Redevelopment Project (Tax Increment Financing)

The SFC Project would not be developed as the first phase of the redevelopment project without City financial assistance for the construction of the new public parking facilities and public infrastructure improvements needed to support the development. The vehicle for that assistance is the tax increment financing authorized by the Municipal Redevelopment Law. Although infrequently utilized in New York, tax increment financing is an indispensable self-financing tool used throughout the United States to help local governments successfully redevelop urban areas and encourage economic development.

When originally conceived, urban renewal projects included State and federal funding for virtually all public improvements, land acquisition, demolition and site preparation costs. Federal funding for urban renewal was eliminated prior to the establishment of the

Community Development Block Grant ("CDBG") Program. Although CDBG funds can be utilized for urban renewal activities, they can also fund other activities, many having greater immediate priority. Given reduced CDBG funding allocations and the virtual elimination of other federal and State urban renewal assistance, many localities permitted urban renewal programs to languish, anticipating private sector investment.

With the tax increment financing, long-overdue improvements to the obsolete infrastructure systems in downtown Yonkers would be realized – improvements that are required not only for the SFC Project, but for the revitalization of the entire project area. Roads and utilities would be upgraded. Together these improvements would make the project area attractive for redevelopment.

See also Section IV, above.

G. SEQRA Compliance

Pursuant to Section 970-e of the Municipal Redevelopment law, the potential environmental impacts of a proposed preliminary plan must addressed in a draft environmental impact statement.

This preliminary plan is intended to facilitate the SFC Project that is described in the SFC Project DEIS. Because the preliminary plan is narrowly tailored to the SFC Project, the potential environmental impacts that might arise as a result of the implementation of the proposed preliminary plan are generally indistinguishable from the potential impacts of the SFC Project, and analysis of these impacts is therefore subsumed in the analyses of SFC Project impacts contained in the SFC Project DEIS.

The City Council of the City of Yonkers is the Lead Agency for the SEQRA review of the SFC Project, including this preliminary plan and the proposed tax increment financing. This preliminary plan cannot be approved by the City until the SEQRA review of the SFC Project, including the review of this preliminary plan, is completed by the City Council..

VII. APPENDICES

New York Washington, DC

Mr. Joe Apicella Cappelli Enterprises 115 E. Stevens Avenue Valhalla, NY 10595

Re: Project in Yonkers, NY

Dear Mr. Apicella,

We want to thank you for the opportunity to be involved in what appears to be a very exciting re-development project in downtown Yonkers, NY. This project is ambitious in scope and will change the landscape of downtown Yonkers. Also the site has great proximity to Manhattan and with the amenities you provide in your master plan this location should be a viable and cost effective alternative to New York City. Our preliminary research shows a significant opportunity for an upscale branded hotel of approximately 150 keys in your development. Under the right circumstances, we would be interested in developing a mid-tier Marriott branded hotel such as a Courtyard or a comparable Hilton product.

We are in the process of researching competitive hotel products in the market and creating a preliminary development budget. Enclosed is a preliminary executive summary for the Courtyard by Marriott Yonkers, NY.

Please keep me informed of your progress. We are in the area regularly and would like to meet at your convenience to discuss the project at greater length.

Thank you, Ki M. Ung.

Hotel Development, Management & Consulting Since 1980

EXECUTIVE SUMMARY

Urgo Hotels is a family owned real estate development and management company specializing in hotel projects. As an owner/operator of leading brands, Urgo Hotels has a proven track record of providing its owners, investors, lenders and franchisors with solid returns on their investment; investing in associates and providing them with the highest quality work environment available in the industry; and providing guests with superior product and exceptional service.

Urgo Hotels develops, owns and operates distinctive hotels in significant markets which consistently outperform their primary competitors and achieve outstanding financial returns for ownership. The company and its affiliates presently have ownership interests in and/or operate 16 hotels with a total of 2,329 rooms in five north-eastern and Mid-Atlantic States, the District of Columbia and the provinces of Quebec and Newfoundland, Canada. Urgo generated more than \$113 million of revenue in 2006.

Under the stewardship of its senior management team, Urgo Hotels has been recognized as one of the top 100 hotel developers by *Hotel Business Magazine*, a leading industry publication, and by the Marriott and Hilton franchise communities as one of the top performing hotel operators within their respective franchise groups.

Urgo Hotels currently owns and/or manages six hotels in the NY and NJ area and has extensive experience in these markets, including many hotels that have been developed and sold in previous years. A full list of our current portfolio is attached hereto.

The Urgos have an extensive relationship with Louis Cappelli ranging from the development and management of the Residence Inn, New Rochelle to the current development of the Ritz Carlton, White Plains.

Project Description

Urgo Hotels would like to incorporate a 150 room Courtyard by Marriott with meeting space and related facilities and amenities into the proposed Yonkers redevelopment project. The large scale development planned for Yonkers, the dynamic economic climate and hotel market of Westchester County, as well as the close proximity to Manhattan make this a perfect site for a Courtyard by Marriott hotel.

The Marriott branded hotels have consistently been among the performance leaders in their respective markets. A combination of the strength of the Marriott brand, and the cross selling of these products has contributed to annual occupancies and average daily rates that substantially exceed market wide levels. The RevPAR penetration rate for Courtyard by Marriott branded products is approximately 124% for 2006.

The fact that there currently is no high end branded product in the vicinity of Yonkers along with the hotel's affiliation to the Marriott Courtyard brand will provide the recommended hotel with a tremendous competitive advantage and gives the property immediate awareness in the market. This advantage will allow the property to gain and quickly surpass its fair market share of occupancy and average daily rate.

The Courtyard by Marriott product will be an integral part of this development and an enhancement to the overall value and image of the development. In addition, this hotel will bring roughly 75 full and part time jobs to Yonkers.

Market Overview

Yonkers is the fourth largest city in the State of New York with a population of 196,425 in 2005 and the largest city in Westchester County. Yonkers is merely 2 miles from Manhattan and borders the borough of the Bronx. The city runs along the banks of the Hudson River and rises into hills as you head away from the river.

Yonkers has four Hudson-Line Metro-North Railroad stations providing service directly into Manhattan as well as one station that provides Amtrak service. Starting this spring, the New York Port Authority will begin fast ferry service directly from Yonkers to Manhattan.

Competition

The hotel's affiliation to the Marriott Courtyard brand will provide the hotel with a tremendous competitive advantage and gives the property immediate awareness in the market. As previously mentioned, this advantage will allow the property to gain and quickly surpass its fair market share of occupancy and average daily rate.

There is no direct competition for a hotel of this quality and brand level in the immediate vicinity of Yonkers. This hotel will supply a market demand that currently has no options in Yonkers.

The competitive set for this hotel will consist of The Residence Inn-New Rochelle, The Ramada-Yonkers, The Radisson Hotel-New Rochelle, Hampton Inn-Tarrytown, The Crowne Plaza-White Plains, The Marriott-Westchester, The Courtyard-Tarrytown, and the Springhill Suites-Tarrytown. As of April 2007, the competitive supply achieved 12 month moving average annual occupancy of 78.2% and the average daily rate (ADR) for the competitive set was \$154.58. Summaries of the Historical Operating Results of the Comp Set and the Westchester County Market Tract are provided below and full star reports are attached hereto.

Appendix A: Hotel Market Report by Urgo Hotels, Inc. Bethesda, Maryland 20814 Responses to Lamont Blackstone's Comments

1. According to Smith Travel Research, There are 57 hotels with 7,076 rooms in the Rockland/Westchester market area. A list of the properties is attached hereto as Exhibit A. The delineation of size and percentage of total are as follows.

| Number of Hotels | Number of Rooms | Percent of Total Number of Hotels |
|---------------------|--------------------|--------------------------------------|
| 27 | 0-99 | 47% |
| 22 | 100-199 | 39% |
| 8 | 200+ | 14% |

- 2. The demand turndowns and exceptional occupancy at the Marriott branded hotels and other high quality hotels in the surrounding area indicate that there is demand in Yonkers that is forced to stay outside of Yonkers due to the lack of accommodations. Yonkers City officials and planning officials have indicated there is a need for lodging accommodations to house (both short term and long term stays) people visiting their offices from outside the area. Other significant demand generators are the large corporate demand generators in the area listed in number 3.
- 3. The demand generators are listed below.

Marriott has a franchise approval process, which consists of the submission of a franchise application which includes basic background information regarding the proposed project, such as a map showing the location of the site and a site plan and floor plans for the proposed hotel.

- 4. Background information pertaining to Urgo Hotels including a list of properties is attached hereto as Exhibit B.
- 5. Westchester County's location, just north of Manhattan, has been a key factor in the region's attractiveness. Major Fortune 500 companies and international business corporations including IBM, MasterCard International, PepsiCo, Nokia, Kraft Foods, Starwood Hotels & Resorts Worldwide, and Hitachi America have operations in Westchester County. In addition, the county is home to a number of biotechnology and pharmaceutical firms such as Progenics, Regeneron Pharmaceutical, Pfizer, and Bayer Diagnostics. The following table indicates the top ten employers in Westchester County.

Major Employers

| Firm | Number of Employees |
|--|---------------------|
| Westchester County Health Care Corporation | 4,000 |
| IBM – TJ Watson Research Center | 3,000 |
| IBM | 2,500 |

| AT&T Corporation | 2,500 |
|--|--------|
| Payroll Services Plus Inc. | 1,800 |
| Hillbrook Insurance Company | 1,500 |
| Kraft Foods | 1,200 |
| General Cinema Bevs of WVA (Pepsi) | 1,200 |
| Riverside/St. Johns Hospital (Andrus Pavilion) | 1,114 |
| Northern Westchester Hospital Center | 1,098 |
| Total | 19,912 |
| Source: Dunn & Bradstreet, Imarket Data | |

The economic growth of Westchester County is directly associated with the quality of the transportation infrastructure linking the area to the metropolitan area and major markets. Westchester County is home to more than 3,390 miles of state and local highways. Interstate 95 runs through southern Westchester County into Connecticut, and Interstate 87 runs parallel with the Hudson River connecting Westchester to New York City. Interstate 684 is a major highway running north to south that connects many of Westchester's northern and central suburbs before continuing into neighboring Putnam County. The interstate highway runs northeast to central New England and southwest to Pennsylvania.

MTA's Metro-North Railroad, the second largest commuter railroad in the United States, provides approximately 250,000 customer trips each weekday and some 73 million trips per year. Metro-North's three lines – Harlem, Hudson, and New Haven – offer service to and from Grand Central Terminal in Manhattan. Westchester County Airport is owned and operated by Westchester County and provides airlines and charter passenger services. Considered a vital force in the local community, Westchester County Airport employs over 1,500 people and provides an economic impact of more than \$600 million annually.

Westchester County's high quality of life is a key element in the region's economic success. Visitors lured by the county's historical, cultural, and natural charms spend almost \$1 billion each year and generate about \$42.8 million in local tax revenues. Westchester County is home to numerous museums, historical sites, theatres, performing arts centers, and forty county-owned parks. In addition, Westchester County features numerous sporting events including the annual PGA Barclay Classic and the LPGA's Sybase Classic at the Westchester Country Club. The Westchester sports scene boasts the annual Yonkers Marathon and the New York Training Center in Greenburg serves as the combined training facility for the New York Rangers (NHL), New York Knicks (NBA), and New York Liberty (WNBA).

6. Revpar stands for "Rooms Revenue Per Available Room" and may be more correctly defined as total guestroom revenue per available room per day. It is typically calculated by multiplying Occupancy by Average Daily Rate (ADR), as in the following example.

70% Occupancy x \$150 ADR = \$105 Revpar

Because Occupancy and Average Daily Rate are highly correlated, the relationship between the two is best illustrated by Rooms Revenue Per Available Room (Revpar), which reflects a property's ability to maximize rooms revenue.

A properties Revpar penetration rate is a true measure of how a property is performing in its competitive market place. If a property is achieving a 100% Revpar penetration rate, it is capturing its fair share in the market place. If a property is achieving a penetration rate of 124%, then it is capturing 24% more than its fair share.

The following table illustrates the performance of several Marriott Brand Systems versus their respective group of competitors in Occupancy, Average Daily Rate, and Revpar for the calendar year 2006.

| Marriott | Occupancy | Occupancy | ADR | ADR | Revpar | Revpar |
|-------------|-----------|-------------|-------|-------------|--------|-------------|
| Brand | | Penetration | | Penetration | | Penetration |
| | | Rate | | Rate | | Rate |
| Marriott | 71% | 102% | \$154 | 110% | \$109 | 112% |
| Hotels and | | | | | | |
| Resorts | | | | | | |
| Renaissance | 72% | 104% | \$152 | 111% | \$110 | 116% |
| Hotels and | | | | | | |
| Resorts | | | | | | |
| Courtyard | 73% | 108% | \$117 | 115% | \$85 | 124% |
| by Marriott | | | | | | |
| Residence | 79% | 115% | \$114 | 112% | \$90 | 128% |
| Inn by | | | | | | |
| Marriott | | | | | | |

- 7. Urgo Hotels believes that the achievable rate for a 150 room Courtyard by Marriott in Yonkers at stabilization (three years after opening) is \$195.
- 8. The historical operating results are attached hereto as Exhibit C.

URGO HOTELS

Urgo Hotels develops, owns and operates distinctive hotels in significant markets which consistently outperform their primary competitors and achieve outstanding financial returns for ownership. The company and its affiliates presently have ownership interests in and/or operate **18 hotels** with a total of **2,651 rooms** in six north-eastern and Mid-Atlantic States, the District of Columbia and the provinces of Quebec and Newfoundland in Canada. Urgo Hotels generated more than \$113 million of revenue in 2006.

Since the early 1980's, Urgo Hotels and predecessor entities, have been involved in the development, acquisition, rehabilitation, re-positioning, and management of hotel properties. Starting in 1982 with the construction and financing of the 617 room Marriott Hotel & Conference Center in Uniondale, New York, and continuing up to the August 2005 opening of the 15-story, 188 unit "Residence Inn at the Inner Harbor" in downtown Baltimore, Maryland, as well as the August 2006 opening of the "Marriott Residence Inn and Marriott Courtyard Montreal Airport". Urgo Hotels and its predecessors have been involved in all aspects of ground-up development, conversion and renovated properties from acquisition, entitlement and design to financing. Today, there are eighteen hotels in this portfolio as well as involvement in multiple mixed-use developments across the east coast and in the Caribbean, including proposed Ritz Carlton projects in Antigua, Bermuda and Costa Rica and three five-star luxury hotel and residential developments as a part of a 500 acre mixed-use development on the Island of Eleuthera in the Bahamas which includes an 18-hole golf course and a 200 slip marina, and multiple hotels under development in North America, two property interests having been disposed in 2001 and two more in 2006. These hotels are listed in the attached property list and all of them, except for the Bethesda "Residence Inn by Marriott" are managed by Urgo Hotels.

As hotel developers, investment advisors, and managers, the principals of Urgo Hotels have shown a unique ability to create and arrive at solutions for their clients and partners. Over the years, Urgo Hotels and its predecessor - Urgo Butts & Company - have acted as counsel and advisors to a number of institutional, development, and operating clients including, among others, the Marriott Corporation, Hyatt Corporation, Hilton International Hotels, Howard Johnson, the World Bank, the IMF, the Trammel Crow organization, Ted Lerner Enterprises, Americana Hotels and Realty Corporation, Hanover Trust Company, The Bank of New York, The Riggs National Bank of Washington, D.C., Chemical Bank, The Travelers Insurance Company and Merrill Lynch. Airline clients have included Northwest, Pan Am, TWA, Aer Lingus, BWIA and LIAT.

Operations

Under the stewardship of its senior management team, Urgo Hotels has been recognized as one of the top 100 hotel developers by Hotel Business Magazine, an industry publication, and by the Marriott and Hilton franchise communities as one of the top performing hotel operators within their respective franchise groups.

As an integral part of its comprehensive range of hospitality services, Urgo Hotels and its affiliates have achieved outstanding operating results for hotel properties under their management including hotels affiliated with Marriott, Hilton, Sheraton, Radisson and Choice. Hotels within the Urgo portfolio have consistently ranked among the top performers within their respective franchise systems in several key categories. The following illustrates a sample of some of the awards from Marriott International Inc. and affiliated companies won by some of these hotels (several on multiple occasions) in recognition of outstanding operating performance: Chairman's Award, Regional Hotel of the Year, Highest Extended Stay Occupancy, Quality Assurance Award, Gold and Silver Awards, Highest RevPAR, Highest Occupancy, Highest ADR, General Manager of the Year, Sales Team of the Year, Superstar Development Award, Revenue Management Team of the Year, Combined Sales and Operations Team of the Year, Highest Guest Satisfaction, Highest Occupancy Penetration Index, Highest ADR penetration index, and Highest Revpar penetration index. Our hotels consistently outperform their competitors in their respective markets.

Development, Acquisition and Rehabilitation/Repositioning Process and Expertise

Urgo Hotels pursues opportunities to develop or acquire and rehabilitate or reposition hotels under premium brands, usually with Marriott and Hilton franchise affiliations. Urgo Hotels' ground up development and acquisition philosophy is based on an opportunistic strategy of establishing hotels in major metropolitan markets where there are multiple demand generators which meet the following criteria: (1) the barriers to entry have proven too difficult for most hotel firms to overcome; (2) hotel demand is substantially greater than supply; (3) the competitive hotels exhibit economic obsolescence; and/or (4) Urgo Hotels is able to gain a competitive advantage through superior franchise affiliation. Throughout the development process, Urgo Hotels assembles the development team and co-ordinates each aspect of the process including conception, hotel operations, personnel, investors, lenders, and market consultants.

Urgo Hotels has extensive experience in ground up development and adaptive reuse projects (i.e converting existing residential and office buildings to hotel use). Once a site is chosen, Urgo Hotels assembles and co-ordinates the due diligence team including legal, engineering, testing, construction estimating/budgeting, management and marketing consultants. Urgo Hotels draws upon its historical database for budgeting development costs and operating projections, usually supported by independent, thirdparty market analysis. Additionally, design and construction is performed by independent, third-party architects, engineers and contractors, co-coordinated by Urgo Hotels. Urgo Hotels then selects and coordinates the efforts of the management team in conjunction with the general contractor through the pre-opening phases of construction. Throughout the development process, Urgo Hotels deploys the hotel operations team which participates in the planning of the facilities program and management of the preopening process which includes oversight of hotel staffing, marketing plans and operating and capital budgets.

Urgo Hotels' development process consists of the following elements:

- Identify site
- Negotiate acquisition and conduct due diligence
- Obtain third-party feasibility, environmental, geotechnical and design studies
- Develop construction budget and initial five-year operations budget
- Work up preliminary drawings; prepare and complete entitlement process
- Arrange franchise license
- Conduct and complete interviewing and bidding process for contractor
- Commence construction
- Provide construction project management services
- Begin pre-opening process approximately one hundred and twenty to one hundred and eighty days prior to completing project
- "Punch out" final building and obtain certificate of occupancy

Urgo Hotels also targets acquisition opportunities that exhibit potential for increased value through (1) repositioning, (2) rehabilitation and/or (3) more affective management. Urgo's process for acquiring and rehabilitating or repositioning hotel properties is very similar to the above development process in terms of sourcing opportunities, assembling and orchestrating the right development team, and managing the execution of the property improvement plan and take-over. The repositioning and rehabilitation processes typically require significant capital investment to expedite major improvements such as replacement of furniture, fixtures and equipment, procurement and installation of franchise operating supplies and reservation and property management systems, upgrades to building exteriors, as well as to public space, common areas and back of house space. Rehabilitation projects call for substantial construction related activities; therefore the process usually necessitates the closure of all or part of the property for some time.

Urgo Hotels also looks for opportunities to acquire mismanaged assets in which the operating performance of a hotel is not reaching its full potential as a result of ineffective management practices.

Senior Management

Urgo Hotels' senior team members average over 20 years of professional experience in all aspects of the hospitality industry. In addition to the development, acquisition, financing and operation of several hotels for Urgo Hotels, members of senior management have encountered and resolved complex financing, investment, acquisition, development and redevelopment issues relating to all hotel property types for several clients over the years.

Donald J. Urgo, Sr. - President & CEO

Mr. Urgo received his undergraduate and law degrees from Fordham University in New York and began his law practice in 1962 with the New York law firm of Hughes, Hubbard and Reed. He developed a specialty in international business transactions with emphasis on the hotel and airlines industries.

In 1972, Mr. Urgo was retained by the Marriott Corporation to spearhead an effort to expand the Company's operations throughout the world. During the next 15 years, he was directly responsible for a number of key acquisitions and joint ventures including the acquisition of the Sun Line Cruise Line; the acquisition of the Howard Johnson Company and divestment of the Howard Johnson franchise group to Prime Motors Inns; and the development and acquisition of numerous hotels and air catering facilities throughout the world. Mr. Urgo also played a key role in the conversion of the Essex House Tower in New York and the Camelback Inn in Scottsdale, Arizona to condominium hotels.

In addition to his work for Marriott, Mr. Urgo has acted as counsel and advisor to a number of institutional, development and operating clients including, among others, Howard Johnson, the Trammel Crow Organization, Ted Lerner Enterprises, Americana Hotels and Realty Corporation, the Bank of New York, Riggs National Bank of Washington, DC, the Travelers Insurance Company and Merrill Lynch.

Throughout his career, Mr. Urgo has also rendered professional services regarding hotel and other matters to a number of airline clients including TWA, Northwest, Pan American, Aer Lingus, and BWIA.

As an integral part of his comprehensive range of advisory and investment services, Mr. Urgo co-founded a hotel management company whose primary role has been to manage hotel assets for clients and investment partnerships in which he participates.

While over the years Mr. Urgo has maintained a close working relationship with Marriott that has enabled his firm to maximize the value of the Marriott Hotels in which he is involved, he also has established solid relationships with executive management throughout the hotel industry which enhance his ability to develop and operate additional brands when and where appropriate.

Donald J. Urgo, Jr. - Senior Vice President, General Counsel

Don Urgo, Jr. received a B.B.S. in Finance from the University of Notre Dame followed by a law degree from the Columbia School of Law, Catholic University of America in 1990. He spent six years in private practice as a litigation attorney practicing in the state and federal courts of Maryland and the District of Columbia. While concentrating in the areas of contract and commercial law, torts and workers' compensation matters, Mr. Urgo's clients included companies such as Bell Atlantic/Verizon, Marriott International, Inc., Liberty Mutual Insurance Company and the Travelers Insurance Company.

Mr. Urgo left private practice to join Integrated Communications Corporation in 1996. A privately held firm headquartered in Delray Beach, Florida, ICC is a communications marketing and management company that specializes in servicing the hospitality industry and handles a wide array of communications services for more than 2,300 hotels and motels nationwide. As General Counsel for ICC, Mr. Urgo handled all of the firm's legal and regulatory affairs. He was directly responsible for negotiating and handling the company's agreements with all of its current carriers, agents and customers, including contracts with MCI Communications Corporation worth approximately \$150 million in revenue.

Since joining Urgo Hotels in 1998, Mr. Urgo's role has expanded from handling the day-to-day legal affairs of the organization to include active participation in the company's corporate and management activities. His legal background and entrepreneurial experience are a perfect complement to the industry expertise of the firm's other executive team members.

Kevin M. Urgo - Senior Vice President, Development and Finance

Since joining Urgo Hotels in August of 1998, Kevin Urgo has been actively involved in all aspects of the company's development and management activities. Mr. Urgo's primary focus is the oversight of the company's acquisition, development, strategic planning and corporate and project financing activities.

Prior to joining Urgo Hotels, Mr. Urgo was Vice President of Acquisitions and Development with Sunburst Hospitality Corporation, a New York Stock Exchange company and a spin-off company of Choice Hotels International and Manor Care, Inc. While at Sunburst Hospitality and its predecessors since 1995, Mr. Urgo was responsible for the company's acquisition and development activities in the Southeast and Mid-Atlantic regions, which included the active involvement and oversight of more than 25 hotel acquisitions and development projects.

Prior to joining Sunburst Hospitality, Mr. Urgo worked as a consultant with Arthur Consulting Group International, acting as advisor to several institutional groups, various domestic and international governmental organizations and private developers including, among others, Hyatt Corporation, Choice Hotels International, Industria Nacional Hotelera, the World Bank, Organization of American States, the City of Oakland, CA and the City of Quincy, MA. While with Arthur Consulting Group, Mr. Urgo conducted hotel and restaurant market and feasibility studies, appraisals and economic impact studies, as well as tourism area development studies and strategic planning assignments. Prior to his tenure with Arthur Consulting Group International, Mr. Urgo worked for various financial institutions.

Collin D. Urgo - Senior Vice President, Operations/Marketing

Collin Urgo began his career with Residence Inn by Marriott in 1990 as a member of the opening team at the Plainview Residence Inn by Marriott, the first extended stay property ever to be converted by Residence Inn, or any other major hotel chain. Since then he has been a member of, or managed, the conversion or opening of more than 15 upscale extended stay, select service and focused service hotels for Marriott and Hilton.

His experience with Marriott began in housekeeping and took him through maintenance, meetings / banquets, food service, front office and sales from 1990 to 1995. After serving as Business Travel Sales Manager on the opening team at the Gaithersburg Washingtonian Center Marriott in 1992 and serving as a Regional Sales Manager for twenty-five Courtyard and Fairfield Inn by Marriott hotels in Washington, DC, Maryland and Virginia from 2003 to 2005, he joined Urgo Hotels to open the White Plains, New York Residence Inn by Marriott as Director of Sales.

Collin became the General Manager of the White Plains Residence Inn by Marriott in 1999. He was named General Manager of the Year 2001 for Residence Inn by Marriott's northeast region and the "Business Person of the Year 2001" for Westchester County, New York while holding that position until 2002, when he became V. P. Operations for Urgo Hotels.

He has spent the better part of his fifteen years in the industry representing high end branded extended stay, select service and focused service hotels such as Residence Inn, Courtyard, Spring Hill Suites and Fairfield Inn by Marriott and Homewood Suites and Hilton Garden Inn by Hilton. He is one of the most experienced executives in the industry when it comes to positioning, marketing, selling and operating these atypical hotels.

Phil Daniel – Senior Vice President, Finance

Phil Daniel worked for Americana Hotels Corporation from 1973 to 1987, holding a variety of positions including Vice President, Accounting; Director of Financial Services; Northeast Regional Controller, Property Controller, and Assistant General Manager.

From 1985 to 1987, Mr. Daniel assisted Americana Hotels Corporation, Americana Hotels & Realty Corporation, and Bass Enterprises in Ft. Worth, Texas, with the sale and disposition of 36 Hotels, Resorts and Inns.

Since joining Urgo Hotels in 1987, Mr. Daniel has served as Corporate Controller and Chief Financial Officer for 19 Hotels and several affiliates and partnerships. During that time, he continued to assist Americana Hotels & Realty Corporation in Boston with the sale of its hotels and liquidation of its Real Estate Investment Trust.

Presently, Mr. Daniel supervises the operations of Urgo Hotels' managed properties as well as the financial and accounting administration.

Richard Riccio - Vice President, US Operations

Richard Riccio received a B.S. in Marketing and Finance form the University of Connecticut in 1989. He has been a presence in the hotel industry since 1987. He started in the industry as a front line employee, a Bellman at the Marriott Trumbull, CT. After joining Residence Inn by Marriott in 1990, he quickly became a General Manager specializing in opening and ramping up hotels throughout the United States. In 1997, Richard was honoured as Marriott's Opening General Manager of the Year.

Richard has been a member of the Residence Inn by Marriott System Standards Board since 1998. The Residence Inn System Board assists Marriott International in setting guidelines and standards for the brand. Richard joined Urgo Hotels in October, of 2003 to head US Operations. Richard continues to focus the portfolio of Marriot and Hilton products on three major themes: revenue generation, exceptional service and return on owner investment.

Serge Primeau – Vice President, Canadian Operations

Serge Primeau has a degree in political science from the University of Ottawa. He has been in the hotel industry for more than 15 years. His career started on the sales side as Account Executive, Director of Sales, and Director of Sales & Marketing for Le Chantecler Resort and Conference Center over the course of 8 years.

He was General Manager of Hotel La Sapiniere, a well-known hotel recognized for its 4-Star service, outstanding dining and wine cellar. He joined Urgo Hotels at the Marriott Residence Inn in Mont-Tremblant in 1997, acting as General Manager while becoming Vice President of Canadian Operations for the company. He has been a board and executive member of Quebec Resort and Country Inns for 3 years, founding member of the Laurentian Convention Bureau and is President of The Maple Route Association (comprised of all Eastern Canada's key suppliers of tourism products to the Japanese market). He is also a board member of the Tremblant Resort Association and is involved in the marketing committee of the Tremblant Resort as well as many other subcommittees. He has a wide knowledge of the national and international markets and has been involved in many tourism missions in Europe, Japan and the United States along with Tourism Quebec and the Canadian Tourism Commission.

<u>Robert Spence – Vice President, Quality Assurance</u>

Robert Spence is presently responsible for Quality Assurance for Urgo Hotels. Robert's primary focus is to ensure that the high standard of Quality Assurance is consistent throughout the company's properties. On a daily basis, Robert focuses on the execution of new systems and standards within the hotels. Robert is also heavily involved with new construction projects and property-specific major renovations.

Robert's corporate responsibilities include, in part, training all Chief Engineers on fire protection and life safety systems within the hotels; understanding and managing departmental budgets and inventories; facilitating communication inside and outside of the hotels; as well as daily job duties and oversight.

Robert brings over 25 years of engineering and general construction expertise to Urgo Hotels. Having formerly served as Regional Director of Engineering for the company, he has mastered all phases of mechanical equipment, including HVAC, electrical, plumbing, carpentry, painting and maintenance for indoor and outdoor pools and spas.

Robert's overall expertise and command of the hospitality industry, as well as his detailed working knowledge of Marriott and Urgo Hotels systems and procedures, continues to be a major contribution to the current and future success of Urgo Hotels.

Ellen Wimsatt – Corporate Director of Human Resources

As Corporate Director of Human Resources for Urgo Hotels, Ms. Wimsatt works closely with general managers and senior management on management recruiting, staffing, and career development issues. Her responsibilities also cover overall human resources administration and employee relations.

Prior to joining Urgo Hotels in July 2003, Ms. Wimsatt spent 15 years with Marriott International. As Director of Employment and Director of Career Development for the Residence Inn brand, Ms. Wimsatt managed all management staffing and succession planning initiatives for the Regional Operations and Regional Sales teams. She created and facilitated training programs for hotel general managers and sales directors at national conferences. She was the Residence Inn brand liaison on many corporate-wide initiates (eg: Sales 2000; Marriott's Career Management System; Cross Brand Training; Marriott Lodging Relocation). Her experience with Marriott covers all brands, international and domestic hotels, franchise relations, and corporate and executive staff.

Ms. Wimsatt's career began in Wichita, Kansas, where she was part of the transition team when Marriott acquired the Residence Inn Company in 1987.

Office Component Market Analysis:

1. The disparity between population and available *office* space is and has been a significant concern in Westchester County for the last 25 years. The high cost of living and the lack of affordable housing throughout most of the County have led to a relatively shallow labor pool.

Currently, the available office space in Yonkers is disproportionate to the population of the city as compared with other densely populated cities such as White Plains. If a developer can provide a quality office product, easy access to major thoroughfares and a cheap labor pool the complex will be attractive to employers. Access to quality, relatively inexpensive labor, is a key driver and a significant attraction to occupiers of office space.

2. The commercial real estate market needs to grow in Westchester in order to accommodate the overall economic growth in the County. This is particularly true of quality, Class "A" office space which has seen demand far outstrip supply in Westchester County. There has been a continued flight to quality by tenants searching for Class "A" space that provide a robust amenity package and a location within walking distance to the train.

Office markets throughout the metropolitan area are driven by conditions in Midtown Manhattan, the location of choice for most office space users. When the amount of available office space in the Midtown market declines below 7% during periods of economic expansion, rents tend to increase sharply, leading companies to seek less expensive alternatives.

Historically, these companies have looked to the Downtown market and, as pricing increased there, moved out to the outer boroughs, New Jersey, Westchester County, and Connecticut. Today, the vacancy rate for Class A office space in Midtown is 5.7%, down from 6.3% a year ago. This decline has pushed rents up to record high levels, with Class A space currently fetching \$81.74per sf ("psf"), more than 29% higher than a year earlier. This sharp increase has led many tenants, particularly those with narrow profit margins, to look to less expensive locations. The result has been a rapid tightening of the Downtown market (from 8.0% vacancy a year ago to 5.4% today) and a sharp increase in rents for the Downtown market (Class A rents are up 22% to \$52.28psf). As a result, we are now seeing movement to the outer boroughs, Long Island City, New Jersey, Westchester County, and Connecticut.

Yonkers has the opportunity to provide a sensible alternative for companies looking outside of Manhattan. It is well positioned to attract companies looking for a low cost alternative and is attractive for its close proximity to NYC and connectivity to the Metro North.

3. See attached Market Report. Additionally, below is a list of large blocks of available space currently in the County:

| Address | Owner | Asking Rent* | Available Space |
|--------------------------|--------------------|-----------------|--------------------|
| 44 South Broadway | Beacon | \$35.00 | 307,633 |
| 1 Readers Digest | Summit Development | \$29.00 | 170,000 |
| 1133 Westchester Ave. | RPW Group | \$29.00 | 300,000 |
| 440 Mamaroneck Ave. | RPW Group | \$29.50 | 238,000 |
| 103 Corporate Park Drive | Rexcorp | \$28.00 | 70,128 |
| 450 Mamaroneck Ave. | Property Reserve | \$25.00 | 165,000 |
| 7 International Drive | SL Green | \$35.00 | 315,204 |
| 333 Westchester Avenue | Cohen Brothers | \$27.00 | 209,000 |
| 1 Pepsi Way | Witkoff Group | \$29.00 | 115,625 |
| 900 King Street | Wafra | \$28.00 | 110,000 |

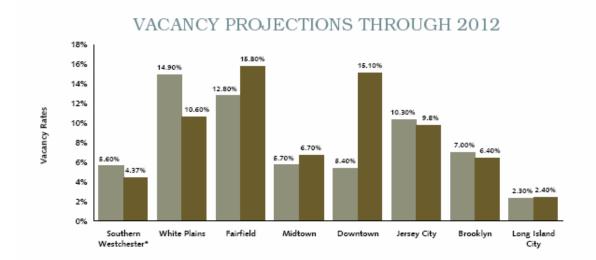

Large blocks of current and proposed space in Westchester:

4. Access to the train is a key driver for tenants when considering office locations within Westchester County. It is paramount that a building provides safe and convenient access to the train. Many companies are focused on enticing intellectual capital out of NYC to fill managerial positions within their companies. In order to promote reverse commuting the connectivity to the train must be easy and convenient.

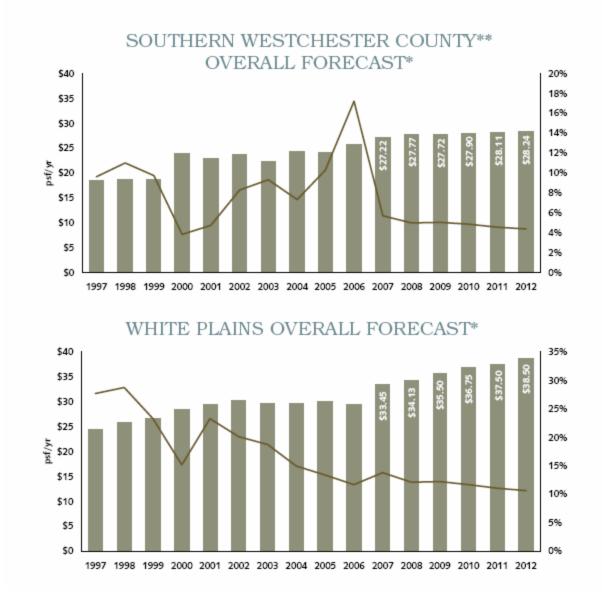

Downtown White Plains has office buildings that are up to 15-20 minutes walking distance from the train and still considered within the Central Business District. Those buildings closest to the train have experienced the lowest vacancy rates, with an average vacancy rate of less then 5%. This illustrates that there is pent up demand for large blocks of Class "A" space in buildings located in close proximity to the train.

5 & 8. Projections for rental rates and vacancy rates in the tri-state area will depend on the economic growth of the region and its impact on demand for space, coupled with projected new construction over the time frame. C&W's demand forecast is based upon employment projections for each market, developed in conjunction with Moody's Economy.com, a well-known economic consulting and forecasting firm. In summary, the Moody's forecast calls for a slowdown in employment growth from the strong pace of the past several years as the effects of the national economic slowdown and weakness in the financial sector are felt in the regional economy. However, after a year of moderate growth, there is likely to be a reacceleration of employment growth in the 2009-2012 time frame, as economic performance improves.

This continuing employment growth will come into a market that is supply constrained. The Manhattan market supply will increase moderately until 2011-2012. From 2007 to 2010, a total of 6.5 million sf will be delivered to the market, but in 2011 and 2012, as the World Trade Center sites are developed, an additional 18 million sf is likely to be completed. The net result will be continuing rental rate increases until the 2011-2012 period, when new supply will lead to a flattening of rental rates.

We do not expect any significant decline in rents over the next five years, as the fundamental supply/demand drivers will tend to push rents upward. Even if there is a decline in demand, it is likely to be temporary and not affect the overall long-term trend. The fundamental upward trend will carry much of the region along with it. Like Manhattan, significant new construction is not expected in any of these markets, with the exception of Stamford, where there are two major projects under construction. Rental growth will vary substantially from region to region in the metropolitan area. In White Plains, there has been very little change in rents until recently, and we expect a moderate upward trend to develop as a result of rising demand from New York. Similar trends are projected for Fairfield County and New Jersey as well as the boroughs. No area is likely to see rents rise as rapidly as Manhattan; however, as Manhattan prices increase, there will be movement outward with associated upward pressure on rents.

RENT PROJECTIONS THROUGH 2012

Below is a list of the tenants that are currently in the market for office space in the Tri-State area. These are typical of the types of tenants that would consider Yonkers as a viable alternative to relocate their headquarters.

Tenants in the Market:

| TENANT | SIZE (SF) | MARKET |
|---|------------------|-------------------------------------|
| Pepsi Bottling Group | 360,000 | Westchester County |
| HSBC | 250,000 | Manhattan |
| Gen Re | 250,000 | Fairfield County |
| Gartner | 200,000 | Fairfield County/Westchester County |
| Saint Elizabeth Ann Seton Hospital/The Foundling | 200,000 | Manhattan |
| Nestle | 175,000 | Fairfield County/Westchester County |
| AIG | 150,000 | Stamford/Norwalk |
| Deloitte & Touche | 150,000 | Fairfield County |
| Citigroup | 130,000 | Westchester County |
| Blue Sky Studios | 80,000 - 100,000 | Westchester County |
| Jones Apparel Group | 80,000 | Westchester County |
| Mizuho Bank | 80,000 | Westchester County |
| PepsiCola | 20,000-50,000 | W Westchester County |
| Energy Nuclear Northeast | 50,000 | Westchester County |
| Clarendon Insurance | 50,000 | New Jersey |
| St. Johns Riverside Hospital | 50,000 | Westchester County |
| TBS Shipping | 30,000-40,000 | Westchester County |
| Journey Packaging | 30,000-40,000 | Westchester County |

7. Two examples of mixed use projects that have shown success in the office leasing component are:

Vernon Hills Complex, Scarsdale:

A 700,000 sf retail and office mixed use complex located in Scarsdale, NY. The complex is home to some of the country's top retailers including The Gap, Brooks Brothers and American Eagle. The 200,000 sf office portion of the complex has remained between 85%-95% leased over the past 20 years.

Triangle Center, Yorktown:

A 225,000 sf retail and office mixed use complex located in Yorktown Heights, NY. The 16,000 sf office portion of the complex is currently 100% leased.

9. We believe there will a 12 - 24 month lease up period to bring the property to an equilibrium occupancy rate of 85% - 90%.

10. Cushman and Wakefield is a global real estate firm that has over 11,000-plus worldwide employees, located in 192 offices throughout 58 countries. C&W:

- Services more than 200 exclusive or preferred global corporate clients with multiple locations and broad service requirements.
- Manage more than 6,800 properties worldwide representing over 385 million square feet.
 - Global: performed 19,200 transactions (leasing and sales)
 - More than \$69 billion in aggregate value
 - More than 450 million square feet
- United States: performed 9,276 transactions (leasing and sales)
 - More than \$40 billion in aggregate value
 - More than 323 million square feet

Below is a list of C&W's relevant agency experience in Westchester County:

| LEASING AGENCY | SIZE (SF) | COMMENTS |
|---|--------------|--|
| 44 South Broadway White Plains, NY | 850,000 | Maintained 85% average occupancy over last five years. Currently responsible for leasing and property management with the building 95% leased. |
| White Plains Plaza White Plains, NY | 700,000 | 50% leased to 95% leased. Currently responsible for leasing and property management. |
| 303 South Broadway Tarrytown, NY | 180,000 | 20% leased to 100% leased in 18 months. Building has remained at over 95% leased over the past 10 years. |
| 800 Westchester Avenue Rye Brook, NY | 570,000 | 0% leased to 95% leased in 18 months. Dominated the Eastern submarket's transactions in 2006. |
| 120 Bloomingdale Road White Plains, NY | 145,000 | 0% leased to 100% leased in 12 months. |
| 555 Pleasantville Road Briarcliff, NY | 138,000 | 20% leased to 100% leased in 22 months. |
| Harrison Court White Plains, NY | 185,000 | 60% leased to 100% leased in 12 months. Converted property to all medical. |
| 900 King Street | 200,000 | 0% leased to 100% in 30 months. Building was vacant for 10 years prior to hiring C&W. |
| One Theall Road Rye, NY | 65,000 | Vacant and on the market for lease or sale. Sold the property to a medica group in 9 months |

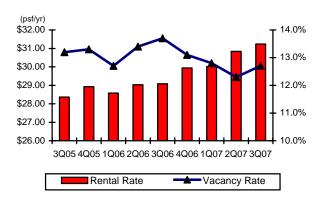

MARKETBEAT SNAPSHOT

OFFICE OVERVIEW WESTCHESTER COUNTY, NEW YORK

The Westchester County office market closed the third quarter showing good activity across the county with a steady demand for office space. Activity out of New York City also continues to remain strong. While there have been a few large transactions, the market year-to-date has been dominated by small transactions, with 65% of square footage and 95% of

transactions consisting of deals less than 20,000 square feet (sf). There are, however, a good number of New York relocations and local transactions currently in the pipeline in excess of 75,000 sf that are expected to close in the fourth quarter.

Direct Rental vs. Vacancy Rates

The overall class A vacancy rate for the county registered at 17.0%, a slight increase from 16.8% last quarter. The overall vacancy rate for the county registered at 14.7%, a decrease from 14.8% last quarter and 16.3% one year ago. This overall change in vacancy has been somewhat influenced by a few tenants taking sublease space off the market.

Though leasing activity remained steady for the quarter at 402,462 sf and 1.3 million square feet (msf) year-to-date, overall absorption was negative for the quarter at 210,206 sf, primarily due to the addition of

over 200,000 sf at 440 Mamaroneck Avenue in Harrison. The submarkets that accounted for more than 65% of the leasing activity for the quarter were Eastern (148,159 sf) and White Plains Central Business District (CBD) (120,792 sf). Significant transactions for the quarter included Bank of New York for 78,500 sf at 440 Mamaroneck Avenue in Harrison and Disney Publishing Worldwide for 60,702 sf at 44 South Broadway in White Plains.

The direct average rents for class A space registered at \$31.98 per square foot (psf), up from \$31.82 psf last quarter and \$30.12 psf a year ago. Pricing of rents pressured upwards due to capital market sales and credit availability. The White Plains CBD submarket posted the highest average rent for the county at \$35.19 psf, with some buildings averaging over \$40.00 psf.

During the third quarter, activity remained strong across the county with a steady demand for office space. Westchester County property sales totaled more than \$200 million at the end of the third quarter. Significant sales included The Centre at Purchase, a four building complex located at Manhattanville Road in Purchase for \$166,000,000 or \$268.00 psf and 150 Grand Street in White Plains for \$6,700,000 or \$71.00 psf.

Looking ahead, there are several large transactions currently in negotiation that should give the market a "fourth quarter bounce." This should create a lot of momentum and optimism going into the new year.

Third Quarter 2007

Memorandum

| CC: | John Saccardi, Saccardi & Schiff | ERA No. 16727 |
|-------|---|---------------|
| RE: | Residential Research for SFC Yonkers | |
| From: | Economics Research Associates, New York | |
| То: | Joe Apicella, Cappelli Enterprises | |
| Date: | January 11, 2008 | |

Dear Joe:

ERA has prepared a brief memorandum presenting information and findings to assist you with responding to comments on the Marketing Directors' residential market analysis for the SFC Yonkers project. Specifically, this memorandum provides data and analysis concerning competitive projects, absorption, and the potential repositioning of SFC Yonkers residential units as rentals. Given the short time frame available for this research, ERA has not conducted a full-scale residential market analysis. The information contained here is intended to complement existing research. Please do not hesitate to contact us should you have questions, comments, or require additional research.

Competitive Analysis

Condominium Projects

ERA has collected data on a number of condominium projects that would be competitive with the SFC project in Yonkers. While there are likely to be additional residential projects competing for buyers at the time SFC units are delivered, this memorandum focuses on those projects for which data is currently available. ERA examined a variety of new condominium projects that are located in urban centers north of New York City with good access to regional rail lines, similar to Yonkers. Projects were identified in New Rochelle, White Plains, and Stamford, CT. Figure 1 presents those condominium projects that are considered by this analysis. Figure 2 presents a map depicting the location and size of the competitive condominium projects. The following section describes the competitive projects in detail.

The Residences at Jefferson Place – White Plains

The Residences at Jefferson Place is a 281-unit condominium project with prices ranging from the low \$300,000s to the mid \$600,000s. Units offer granite countertops, hardwood flooring, high ceilings, ceramic tile, and a washer and dryer. Building amenities include 24-hour concierge service, a fitness center, a clubroom with a fireplace and a pool table, a media room, a business center, and conference room.

The Residences at the Ritz-Carleton – White Plains

The Residences at the Ritz-Carleton includes 236 units in two 40-story glass towers. The residences are part of Cappelli Enterprises' Renaissance Square, a new \$400 million, 890,000-square-foot mixed-use complex. Pricing at the Residences at the Ritz-Carleton starts at \$800,000. The units offer sweeping views, gourmet kitchens, and luxury finishes. Amenities include a lounge, fitness center, room service, spa, business center, children's play room, and chauffer service. Some units offer extended-stay services such as housekeeping and concierge services, provided by the Ritz-Carleton hotel.

Trump Tower at City Center – White Plains

Trump Tower at City Center is a 203-unit, 35-story condominium project completed in 2005. The building is attached to a municipal parking lot with rooftop amenities for residents, including a pool and lounge area, two tennis courts and a paddle board court. The adjacent City Center project includes 450,000 square feet of retail, restaurant, and entertainment space that houses Target, Circuit City, Filene's Basement, Barnes & Noble,

a 15-screen multiplex, New York Sports Club, and the White Plains Performing Arts Center.

543 Main Street – New Rochelle

The 543 Main Street building is a 90-unit condominium project offering one- and twobedroom units, ranging in price from \$240,000 to \$600,000. Amenities include concierge service, a resident building manager, fitness center, storage facilities, and on-site parking. Many of the homes have private terraces or balconies. All units have a washer and dryer, hardwood flooring, and high ceilings. Kitchens include stainless steel appliances, maple cabinets, and granite countertops. Baths are equipped with ceramic tile, marble countertops, and wood vanities.

Trump Plaza – New Rochelle

Trump Plaza New Rochelle consists of a 187-unit, 30-story luxury residential condominium tower with 138,000 square feet of retail space on two levels at the base. Prices for the condominium units begin in the low \$500,000s. The one-, two-, and three-bedroom units offer sweeping views, hardwood floors, gourmet kitchens, luxury master bathroom features, and washer and dryer. The project includes a modern parking garage and easy access to New Roc City retail and entertainment offerings.

Trump Parc – Stamford

Trump Parc Stamford is a 170-unit, 34-story glass and cast stone building to be built to the standards of the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) program. The residences are priced from \$670,000. Units will be equipped with granite countertops, hardwood floors, top-of-the-line appliances, designer cabinetry, marble bathrooms and wrap-around terraces that offer views. Amenities will include a 24-hour concierge/doorman, landscaped terrace, indoor swimming pool, full-service health club, wireless lounge, billiards room, screening room, and roof-top observation deck. Trump Parc will also offer a private shuttle bus to the Stamford train station. On-site valet parking will be located on five levels at the base of the building and there will be approximately 3,000 square feet of restaurant space included within the project.

Figure 2: Map of Competitive Condominium Projects

Absorption

ERA relies on the sales performance of the competitive condominium projects to estimate potential absorption at the SFC project. The sales performance of the competitive projects provides a good indication of how similar residential products will sell in downtown Yonkers. While pricing, project amenities, design, and other factors may differ from the proposed SFC project, the competitive projects provide a broad view of condominium sales performance in comparable locations. Additionally, sales data from the competitive projects reflect differing market conditions, from the robust real estate market conditions of 2004 through the current, slow-paced market.

As shown in Figure 1, the size of the competitive condominium projects range from 90 units to 236 units. Sales pace at the competitive projects ranges from about two to 17 units per month, with larger projects generally selling a greater number of units each month. The highest velocity of sales observed occurred at Trump Tower at City Center, a large-scale project which sold out in September 2005, in advance of the residential market slump. The slowest sales observed occurred at the smallest project, 543 Main Street in New Rochelle, which is currently about 90 percent sold.

Based on the historical performance of the competitive condominium projects, ERA estimates that the residential component of the SFC project will achieve monthly sales of roughly eight to 12 units per month, 96 to 144 units per year. Assuming that residential development occurs in phases of between 436 units (Palisades Point) and 475 units (two phases at River Park Center), ERA estimates that each phase of residential development will sell out in 36 to 60 months (i.e., three to five years). This projected pace of sales is greater than that of Trump Plaza New Rochelle, a somewhat smaller-scale project suffering from current market conditions, and less than sales at Trump Tower at City Center, a project that enjoyed robust market conditions during 2004 and 2005.

Potential for Repositioning as Rental

Research concerning the residential rental market in southwest Westchester County indicates that residential units could be successfully marketed as rentals. ERA collected information on a number of Westchester's newer condominium projects to determine current market conditions. As shown in Figure 3, vacancy rates at competitive rental projects range from zero to nine percent, indication of a very healthy rental market. In Yonkers, the Hudson Terrace Apartments have zero vacancy and achieve rents of \$1,600 to \$1,800. A map of the competitive rental project is presented in Figure 4.

M:\CONSULTING\SBER\Yonkers\[Proj. No. 23-A.xls]IX 18-Jan-08

¹Equalization rate is the 2006 equalization rate, relating to property values in calendar year 200

²Newly constructed property in Yonkers is not subsequently reassessed after its initial assessment, regardless of changes to market value

³Base value provided by Cappelli Enterprises Inc., based on an assessed value of \$658,840.

⁴City, School and County tax rates correspond to the same time frame as the equalization rate.

⁵These projections assume property tax rates increase at 4 percent annually. According to the City of Yonkers, the actual average increase in property tax rates from FY 2003 to FY 2007 is 7.3

M:\CONSULTING\SBER\Yonkers\[Proj. No. 23-B.xls]IX 18-Jan-08

¹Equalization rate is the 2006 equalization rate, relating to property values in calendar year 200

²Newly constructed property in Yonkers is not subsequently reassessed after its initial assessment, regardless of changes to market valu

³Base value provided by Cappelli Enterprises Inc., based on an assessed value of \$658,840.

⁴City, School and County tax rates correspond to the same time frame as the equalization rate.

⁵These projections assume property tax rates increase at 4 percent annually. According to the City of Yonkers, the actual average increase in property tax rates from FY 2003 to FY 2007 is 7.3
