FEBRUARY 2008

Introduction

This appendix presents and summarizes the results of two assessment surveys and was written by Walter R. Wheeler and Robyn L. Bauw. The first assessment survey, conducted on 5 October 2006 by architectural historian Robyn L. Bauw, was prepared for the pDEIS and surveyed the standing structures within the four project areas. The second survey, led by architectural historian Walter R. Wheeler and conducted on 24-25 January 2008, included a survey of all standing structures within a 500 foot radius of each of the four proposed project areas. The pDEIS did not include a survey of these structures.

The results of the earlier (project area) report have been incorporated into the present document and its findings are presented here, following the presentation of the results of the study areas assessment. Tables of determinations of eligibility and of impacts for structures within the study areas and within the project areas can be found in their respective sections. The Survey Determination tables (Tables 1 and 3) incorporate information compiled from lists obtained from the City of Yonkers, from the pDEIS, and from a site file search at the NYSOPRHP. The findings of the two assessment surveys are summarized at the end of the text portion of this appendix.

The location of each structure within the survey areas is indicated on Map 1 (for the 500 Foot Buffer Study Areas) and Map 2 (for the Project Areas) which accompany this appendix. Determinations of cultural significance presented in Tables 1 and 3 are indicated by symbols associated with the appropriate structure numbers on the maps. Photographs of each of these structures are presented immediately after the map section of this appendix.

Survey Findings

500 Foot Buffer Study Area Survey

The assessment survey of structures located within 500 feet of the four project areas encompassed a total of 489 standing structures (Table 1). Of these, 129 had been previously surveyed (including two structures which have subsequently been razed and so are not represented on the table) by the New York State Office of Parks, Recreation, and Historic Preservation, and positive determinations of eligibility for listing on the National Register of Historic Places were made for 52 of these structures (Table 1, column PNRE). A total of 127 structures have previously been determined to be of local significance (Table 1, column YLS). Twelve structures (represented by 14 different addresses in the table presented here) are already listed on the National Register of Historic Places (Table 1, column NR). A total of 135 structures have been identified as eligible for listing on the National Register by this survey (Table 1, column NRE). Those structures determined by this survey to be not eligible for the National Register (Table 1, Not NRE), include a number of structures that, while not having national significance, have previously been determined to have local significance. One structure is a National Historic Landmark (Table 1, NHL).

This survey only made assessments on those structures for which there was no previous determination of National Register eligibility. Thus structures which had already been determined eligible for listing or are already listed on the National Register were not resurveyed, but their status is recorded in the structure table and images of these structures are incorporated into the photograph section of this appendix. Some of those structures which have previously been determined to have local significance (YLS) are not considered to be eligible for listing on the National Register, yet they are still considered to be significant cultural resources and as such are incorporated into the findings of this survey.

In sum, a total of 243 structures within the study areas have been determined by either previous surveys or by this survey to be of local or national significance, or are already listed on the National Register of Historic Places or as National Historic Landmarks. Each of these structures is represented in the photographic section which follows the text portion of this appendix.

Table 2 presents a listing of the 243 structures within the 500 foot study area which are considered to have cultural significance, together with preliminary determinations regarding the potential direct physical, visual and contextual impacts on each of these structures by the proposed projects. Impacts were determined to have no effect (NE), no adverse effect (NAE) or an adverse effect (AE).

Summary

There will be no effect (NE) on 46 structures within the 500 foot buffer study areas by the proposed project. A total of 71 structures within the study areas will not be adversely effected (NAE) by the proposed project. There is anticipated to be an adverse effect (AE) on a total of 126 structures within the study areas by the proposed project. Of these, 78 will be adversely impacted by the construction of the River Park Center and 48 will be adversely effected by the construction of the Palisades Center. In all cases, the nature of

the effects is visual and contextual, and is due to the scale of the proposed structures relative to the scale of these adjacent buildings.

Project Areas Survey

The survey of structures located within the project areas focuses on the three project areas—Cacace Center, Larkin Square and River Park Center—which have standing structures within them. A total of 36 standing structures are located within the three project areas, with all but two of these being located in the River Park Center project area (Table 3). Of these, none of the structures had been previously surveyed by the New York State Office of Parks, Recreation, and Historic Preservation. A positive determination of eligibility for listing on the National Register of Historic Places has previously been made for one structure (Table 3, column PNRE), and one structure has previously been determined to be of local significance (Table 3, column YLS). None of the structures are already listed on the National Register of Historic Places (Table 3, column NR). A total of six structures have been identified as eligible for listing on the National Register by this survey (Table 3, column NRE).

This survey only made determinations on those structures for which there was no previous determination of National Register eligibility. Thus structures which had already been determined eligible for listing or are already listed on the National Register were not resurveyed, but their status is recorded in the structure table and images of these structures are incorporated into the photograph section of this appendix. Some of those structures which have previously been determined to have local significance (YLS) are not considered to be eligible for listing on the National Register, yet they are still considered to be significant cultural resources and as such are incorporated into the findings of this document.

Summary

In sum, a total of eight structures within the project areas have been determined by either previous surveys or this survey to be of local or national significance. Each of these structures is represented in the photographic section that follows the text portion of this appendix.

Table 4 presents a listing of those structures within the project areas which are considered to have cultural significance, together with preliminary determinations regarding the potential direct physical, visual and contextual impacts on each of these structures by the proposed undertaking. Impacts were determined to have no effect (NE), no adverse effect (NAE) or an adverse effect (AE).

Table 4. Assessment of Impacts: Project Areas

Structure #	Street #	Street Name	NE	NAE	AE	Comments
502	87	Nepperhan Ave			X	Direct Impact (demolition)
509	127-129	New Main Street			X	Direct Impact (demolition)
527	5-7	New School Street			X	Direct Impact (demolition)
529	193	Nepperhan Ave			X	Direct Impact (demolition)
530	195	Nepperhan Ave			X	Direct Impact (demolition)
528	[9]	New School Street (bridge)			X	Direct Impact (demolition)
532	Culvert/Flume	Sawmill River Flume			X	Direct Impact (demolition)

Summary

The proposed project will result in an adverse effect on a total of seven structures which have been determined to have cultural significance within the project areas. Of these, six will be adversely impacted by the construction of the River Park Center, and the proposed undertaking at Larkin Square Center will have an adverse effect on one structure (Structure 532, the Sawmill River Flume). In each case, the nature of the effect is direct, since the project anticipates the removal of these resources.

Conclusion

A total of 525 buildings and structures were included in the combined surveys of the project areas and their 500 foot buffers. Of these, 250 structures have been determined to have either local or national significance.

The proposed project will have an adverse effect on a total of 133 of these 250 structures. Of these, the project will have a direct adverse effect on seven structures (by demolition). The proposed project will result in an adverse visual effect on 126 structures. Of these, 78 will be adversely impacted by the construction of the River Park Center; the construction of the Palisades Center will adversely effect 48 structures.

The text portion of this appendix is followed by maps of the study and project areas, and then by two photograph sections, which present images of each culturally significant structure within the project areas and within the study areas. Each photograph is accompanied by a caption, indicating the structure number assigned by this survey, the street address or location, and a brief description of the resource.

Photographs of all of the structures within the 500 foot study area (including images of those structures determined to not be eligible for listing on the National Register or which have not been determined to have local significance) and within the project areas are presented with this appendix in the form of a cd-rom.
