APPENDIX “F”

ACCIDENT SUMMARY TABLES

ACCIDENT DATA

Accident data was obtained from the New York State Department of Transportation Records Access Office for the study area (Figure No. 1) for the latest available three year period (January 1, 2003 through December 31, 2005) and include the following roadway links:

1) Nepperhan Avenue between South Broadway and Yonkers Avenue
2) Elm Street between Nepperhan Avenue and Palisade Avenue/School Street
3) Palisade Avenue between Elm Street/School Street and Main Street
4) Buena Vista Avenue between Dock Street and Prospect Street
5) Yonkers Avenue between Nepperhan Ave & the Saw Mill River Parkway Ramps
6) Yonkers Avenue between the Saw Mill River Parkway Ramps & Central Park Ave
7) Ashburton Avenue between Warburton Avenue and Yonkers Avenue
8) Warburton Avenue between Glenwood Avenue and Riverdale Avenue
9) Riverdale Avenue between Nepperhan Avenue/Prospect Street and Valentine Lane
10) North Broadway between Glenwood Avenue and Main Street
11) South Broadway between North Broadway and Valentine Lane

The NYSDOT Accident Summary Tables for each of the above roadway links are contained in this Appendix.

A summary of the accident data by year for each of the above roadway segments are shown on Table No. 4A and a summary by intersection are shown on Table No. 4B.

Based on a review of the Accident Reports, the type of accidents are typical type of accidents, such as rear end accidents and turning accidents with apparent contributing factors such as failure to yield right of way and driver error. Inspection of these Tables indicates that there are no high accident locations.

It should be noted that with the recommended/proposed improvements which includes improved geometry, new traffic patterns, removal of parking, a proposed median along Nepperhan Avenue/Yonkers Avenue and new traffic signals connected to the City's Centralized Computer System improved traffic flow in the area is expected.
